Hydraulic Oils:

- Pirtek supply popular commonly used hydraulic fluids
- Available in ISO Grades 46 and 68
- All oils incorporate advanced performance additives to combat rust, corrosion and wear
- Meet or exceed major manufacturer's requirements
- · Handy 10 litre packs or 205 litre drums
- High Viscosity HVI types available upon request

Automotive Fluids:

- ATF Type D is a quality Automatic
 Transmission Fluid suitable for older style
 automatic transmissions and modern Power
 Steering systems available in a 5 litre pack
- For smaller power steering requirements,
 Pirtek offer a 350 ml pack of Power Steering
- For other specialist requirements, please consult Pirtek

Greases:

- NLGI No2 Lithium complex grease contains extreme pressure additive
- Recommended for extended lubrication intervals
- Suitable for wheel bearings (disc and drum brakes), chassis, construction and farm equipment
- Provides superior resistance to water wash out
- · Good adhesive properties
- · Has a smooth texture and is blue in colour

VHT46-10	Hydraulic Oil 46	10 litre
VHT46-20	Hydraulic Oil 46	20 litre
VHT46-205	Hydraulic Oil 46	205 litre

- · Premium mineral based oil with quality additives for long life
- · Good oxidation resistance, corrosion prevention, and anti-wear performance
- Recommended for use in mobile and industrial applications where either mild or severe operating conditions exist
- Ideal for general industrial equipment such as machine tools, rotary air compressors and enclosed gearboxes where extreme pressure additives are not required
- NB: NOT recommended for Lucas pumps with silver bearings
- · Always refer to the Owner's Manual for recommended oil grade and change intervals
- Approvals: Vickers M-2950-S, 1-286-S
 Cincinatti Milacron P68, P69, P70
 DIN 51524 Part 2
 US Steel 127, 136

VATFD AUTO TRANSMISSION FLUID TYPE D

Product Code	Description	Container Size
VATFD-05	Auto Transmission Fluid Type D	5 litre

- · Can be used in all vehicles requiring a IID specification fluid
- Suitable for all GM vehicles up to 1993
- · Can be used for in service fills on most popular vehicles
- Approvals: GM 6137M
 Ford M2C 138-CJ
 DB 236.6
 DB 236.7

VATFDX3 AUTO TRANSMISSION FLUID TYPE DX-3

VPS POWER STEERING FLUID

Product Code	Description	Container Size
VATFDX3-01	Auto Transmission Fluid Type DX-3	1 litre
VATFDX3-05	Auto Transmission Fluid Type DX-3	5 litre

- Formulated with premium base stocks and advanced additive technology to meet the challenging demands of an automatic transmission environment
- · A high quality friction-modified lubricant
- Carries both GM and Ford approvals
- Responsive low temperature fluidity
- Benefits both electronically and hydraulically controlled transmissions
- Surpasses the requirements of Manufacturers specifying DEXRON® III
- · Features greater friction stability to maintain consistent shift performance
- · Meets new tests for wear and shudder resistance
- · Resists thickening due to high temperature
- Approvals:

Dexron ® III qualified Ford M2C 138-CJ, M2C 166-H Mercon Caterpillar TO-2 HN 2105 Allison C4

Product Code	Description	Container Size
VPS-350	Power Steering Fluid	350 ml

- · Formulated to meet the stringent requirements of most power steering units
- Prevents corrosion, oxidation and wear

GM 6297M

- · Helps stop leaks
- Keeps seals and O-Rings pliable

PLEASE NOTE: This product is <u>not suitable for all</u> vehicles / power steering units.

Refer to vehicle owner's manual before application

VM

ALL PURPOSE GREASE LITHIUM COMPLEX WITH 3% MoS₂

Product Code	Description	Cartridge Size
VM-450	MoS ₂ Fortified Lithium Complex	450 gram

- · Special long life grease for high load service conditions
- · Fortified with extreme pressure additives
- · Contains rust and corrosion inhibitors
- · Tackiness adhesive additives prevent squeeze out under high loads
- Molybdenum Disulphide (${\rm MoS}_2\,3\%$) incorporated to increase film strength
- Suited to all types of automotive, industrial and marine applications
- · Meets NLGI No. 2 performance
- · Grey / black in colour
- 5% MoS₂ version available upon request
- 12 Units per carton

VEP2

EXTREME PRESSURE GREASE NLGI NO. 2 LITHIUM COMPLEX GREASE

Product Code	Description	Cartridge Size
VEP2-450	Valplex EP Grease	450 gram

- Contains a non-lead extreme pressure (EP) additive
- Contains rust and corrosion inhibitors
- Suited to extended lubrication intervals of vehicle chassis points
- · Other applications:

Wheel bearings (drum or disc brake equipped) for all types of vehicles and equipment Oscillating bucket pins and universal joints

Ball, roller and slow speed plain bearings under all service conditions

- Meets NLGI No. 2 performance
- · Blue in colour
- Smooth and tacky texture
- 12 Units per carton

CAUTION: <u>DO NOT</u> mix greases. Always thoroughly wash out bearings and housings before repacking

LUBRICANTS CLEANER AND DEGREASER

VABPC BRAKE PARTS CLEANER

Product Code	Description	Aerosol Size
VABPC-400	Brake Parts Cleaner	400 gram

- Quickly removes brake fluid, grease, oil and brake dust while leaving no residue
- The fast drying solvent helps dislodge surface dirt and oil to eliminate brake squeal
- Safe for use on electric motors, switches and distributor contacts during maintenance (do not apply to electrical components whilst they are in service)

VAD AUTO DEGREASER

Product Code	Description	Aerosol Size
VAD-400	SynPower Super Degreaser	400 gram

- An emulsifiable fluid with high solvency for removal of sludge and grime
- · Clean engines, chassis, parts and concrete floors
- Simply spray on, allow to soak, and remove with jets of water
- Do not use on wet surfaces, since water will reduce the cleaning performance
- Available in bulk supply packs (5, 20, 205 litre) to special order

LUBE EQUIPMENT GREASE, OIL, FUEL, WATER & AIR

Description:

system

greasing

- Pirtek's extensive range of fuel, lubricant, chemical and solvent drum pumps facilitate quick and easy fluid transfer
- If you are aiming to source a cost effective means of transferring fluids out of drums,
 Pirtek will have the equipment to suit your needs to get the job done quickly

The extensive range of Pirtek Greasing

equipment facilitates the quick and efficient

lubrication of plant and machinery, be it with

the aid of simple grease nipples and grease

guns or a multi-zoned, fully monitored lube

The new industry benchmark Series PL1

grease guns guarantee quick and easy

Strong technical back-up by our network will

ensure that your lubrication problems are

quickly and professionally solved

Product Range:

- 20 litre drum pumps
- · 60 litre drum pumps
- · 205 litre drum pumps
- · Hand operated drum pumps
- Air operated drum pumps
- 12 volt, 24 volt, 240 volt drum pumps
- Synthetic or mineral based lubricant transfer drum pumps
- Kerosene, diesel fuel or petrol transfer drum pumps
- Transmission and brake fluid transfer drum pumps
- · Chemical, acid or solvent drum pumps
- · Grease transfer drum pumps
- · Bulk tank pumps
- Air operated diaphram pumps

Product Range:

- Grease nipples and grease nipple assortment kits
- · Grease nipple extensions
- · 450 gram grease guns
- · Grease gun accessories
- · 2.5kg, 20kg, 55kg and 180kg grease kits
- Grease control valves
- Grease swivels
- · Grease hose reels
- · Remote mount and manual grease kits
- Single, dual and multi line grease and oil systems

Applications:

- Ideal for automotive, agriculture, mining, timber, food & beverage and other primary industries
- Suit contractors and construction engineers
- Use in workshops, car dealerships, foundries etc

Applications:

- Industry application includes industrial, automotive, agricultural, transport, mining, marine, petrochemical, construction, food processing, steel and aluminium plants, forestry, milk and dairy, aviation and much more.
- * Please note when using grease gun couplers & grease gun hoses, the grease gun working pressure is rated to the lowest of the component's working pressure.

LUBE EQUIPMENT GREASE GUNS

PL100 STANDARD GREASE GUN LEVER ACTION

Product Code	Description	Grease Capacity
PL100	Standard Lever Action Grease Gun	450 gram

- · Capacity: 450 gm
- Grease cartridge / suction fill.
- Construction: Sheet metal Grease Gun head fitted with Bulk Loader
- · 150 mm steel extn. & standard 4 Jaw coupler
- Develops 6,000 PSI.Threaded: 1/8" BSPTFinish: Powder Coated Blue

PL101 HEAVY DUTY GREASE GUN LEVER ACTION

Product Code	Description	Grease Capacity
PL101	Heavy Duty Lever Action Grease Gun	450 gram

- Capacity: 450 gm
- · Grease cartridge / Suction fill / Bulk Fill.
- Construction : Aluminum Die Cast Grease Gun head fitted with bulk loader & auto air bleeder
- Features: Built-In Variable Stroke, super strong lever handle with rubber grip
- 150 mm steel extension & professional 4 Jaw coupler
- Develops 10,000 PSI
- Threaded: 1/8" BSPT
- Finish : Powder Coated Blue
- · 1 gram/stroke

PL102 HEAVY DUTY GREASE GUN TO SUIT UNDERGROUND MINING LEVER ACTION

	Product Code	Description	Grease Capacity
PL	102	Heavy Duty Lever Action Grease Gun Designed for Underground Coal Mining	450 gram

- · Designed for Underground Coal Mining
- Capacity: 450 gm
- · Grease cartridge / Suction fill / Bulk Fill.
- Construction : Zinc Die Cast Grease Gun head fitted with bulk loader & new air release valve
- Features : Built-In Variable Stroke, super strong lever handle with rubber grip
- 150 mm steel extension & professional 4 jaw coupler
- Develops 10,000 PSI
- · Threaded: 1/8" BSPT
- · Finish: Powder Coated Yellow
- 1 gram/stroke

LUBE EQUIPMENT GREASE GUNS

PL104

LEVER ACTION GREASE GUN CLEAR TUBE, HEAVY DUTY

Product Code	Intended Use	Grease Capacity
PL104	Clear Tube Heavy Duty Lever Action Grease Gun	450 gram

- · Capacity: 450 gm
- · Grease cartridge / suction fill / Bulk Fill
- Construction: Aluminum Die Cast Grease Gun head fitted with bulk loader & automatic air bleeder.
- · Features: Built-In Variable Stroke, super strong lever handle with rubber grip
- 150 mm steel extn. & professional 4 Jaw coupler
- Develops 10000 PSI.
- Threaded: 1/8" BSPT
- · Finish: Clear Tube with Aluminium Ends
- 1 gram/stroke

PL105 MINI LEVER ACTION GREASE GUN

Product Code	Intended Use	Grease Capacity
PL105	Mini Lever Grease Gun	85 gram

- Capacity: 85 gm / 120 cc
- Grease cartridge / suction fill
- Construction : Aluminium Die Cast Grease Gun head fitted with steel block nut
- 150 mm steel extn. & standard 4 Jaw coupler
- · Develops 6000 psi
- Threaded: 1/8" BSPT
- · Finish: Powder Coated Blue
- 0.55 gram/stroke

PL111 PISTOL GRIP ACTION HEAVY DUTY GREASE GUN

Product Code	Description	Grease Capacity
PL111	Pistol Grip Grease Gun	450 gram

- · Capacity: 450 gm
- Grease cartridge / suction fill
- Construction : Aluminium Die Cast Grease Gun head fitted with automatic air bleeder.
- 300 mm Hose & professional 4 Jaw coupler.
- Develops 5000 PSI.
- Threaded: 1/8" BSPT
- · Finish: Powder Coated Blue
- 0.50 gram/stroke

LUBE EQUIPMENT **GREASE GUNS**

PL112

HEAVY DUTY GREASE GUN TO SUIT UNDERGROUND MINING PISTOL GRIP

Product Code	Description	Grease Capacity
PL112	Heavy Duty Pistol Grip Grease Gun designed for underground coal mining	450 gram

- · Pistol Grip Grease Gun
- · Capacity: 450 gm
- · Grease cartridge / suction fill
- · Construction: Zinc Die Cast Grease Gun head fitted with automatic air bleeder
- 300 mm Hose & professional 4 Jaw coupler.
- · Develops 5000 PSI. · Threaded: 1/8" BSP1 · Finish: Powder Coated Blue
- · 0.50 gram/stroke

PL113 HEAVY DUTY GREASE GUN WITH VARIABLE OUTPUT PISTOL GRIP ACTION

Product Code	Description	Grease Capacity
PL113	Pistol Grip Grease Gun (Variable)	450 gram

- · Pistol Grip Grease Gun
- · Capacity: 450 gm
- · Grease cartridge / suction fill / Bulk Fill
- Construction : Aluminium Die Cast Grease Gun head fitted with bulk loader valve.
- Features : Variable handle setting for High Pressure / high volume applications
- 300 mm High Pressure Hose & professional 4 Jaw coupler.
- Develops 7000 psi in High pressure setting & dispenses twice the amount of Grease compared to most other guns in high volume setting.
- · Threaded: 1/8" BSPT · Finish: Powder Coated Blue
- 0.90 gram/stroke

PL114 CLEAR TUBE HEAVY DUTY GREASE GUN PISTOL GRIP ACTION

Product Code	Description	Grease Capacity
PL114	Clear Tube Heavy Duty Pistol Action Grease Gun	450 gram

- · Clear Tube Pistol Action Grease Gun
- · Capacity: 450 gm
- · Grease cartridge / suction fill
- · Construction: Aluminium Die Cast Grease Gun head fitted with automatic air bleeder.
- 300 mm Hose & professional 4 Jaw coupler.
- · Develops 5000 psi
- Threaded: 1/8" BSPT
- · Finish: Clear Tube with Aluminium Ends
- · 0.50 gram/stroke

LUBE EQUIPMENT GREASE GUNS

PL115 MINI GREASE GUN PISTOL GRIP ACTION

Product Code	Description	Grease Capacity
PL115	Mini Pistol Grease Gun with dual discharge ports (inline & 90 deg)	85 gram

- Capacity: 85 gm / 120 ccGrease cartridge / suction fill
- Construction : Aluminium Die Cast Grease Gun head fitted with steel block nut
- 100 mm steel extn. & standard 4 jaw coupler
- Develops 3500 PSI
 Threaded : 1/8" BSPT
 Finish : Powder Coated Blue
 0.40 gram/stroke

PL120 AIR OPERATED HEAVY DUTY GREASE GUN CONTINUOUS ACTION

PL125
HEAVY DUTY GREASE GUN
ELECTRIC

PRODUCT

UNDER

DEVELOPMENT

	Product Code	Description	Grease Capacity
PL	_120	Continuous Action Air Operated	450 gram
		Grease gun	

- Capacity: 450 gm
- Grease cartridge / suction fill / Bulk Fill
- Construction : Aluminium Die Cast Grease Gun head fitted with bulk loader valve.
- 150 mm steel extn. & professional 4 jaw coupler without ball check.
- Develops 4800 PSI.
 Threaded: 1/8" BSPT
 Finish: Powder Coated Blue
- Air inlet: 1/4" BSPTPressure ratio 40:1
- 0.90 gram/shot
- · Delivers 400 grams/minute
- Max air inlet pressure 3-8 bar (40-120 psi)

Product Code	Description	Grease Capacity
PL125	Heavy duty Electric Grease Gun	450 gram

• To be released 4th Qtr 2014

PL140 PROFESSIONAL GREASE GUN **COUPLER 4 JAW**

Product Code **Pressure Rating** Description PL140 6,000 psi Professional Grease Gun Coupler

- Professional 4 Jaw Coupler with Ball Check
- 6000 psi / 415 Bar
- For Hand Operated Grease Guns
- · 15mm diameter
- 1/8" BSPT

PL141 **HEAVY DUTY GREASE GUN COUPLER 4 JAW**

Product Code	Description	Pressure Rating
PL141	Heavy Duty 4 Jaw Coupler	10,000 psi

- · Heavy Duty 4 Jaw Coupler with Ball Check
- 10,000 psi / 690 Bar
- · For Hand & Air Operated Grease Guns
- · 17mm diameter
- 1/8" BSPT

PL142
GREASE GUN COUPLER
90 DEGREE

Product Code	Description	Pressure Rating
PL142	90 Degree Coupler without Ball Check	1,000 psi

- · Hydraulic Coupler 90 Degree without Ball Check
- 1,000 psi / 69 Bar
- · For hand operated Grease Guns
- 1/8" BSPT

PL143 HYDRAULIC COUPLER 360° SWIVEL

Product Code	Description	Pressure Rating
PL143	Hydraulic Coupler 360 Deg Swivel	7,000 psi

- Hydraulic Coupler 360 deg, locks at any 45 deg position
- 3 Jaw with Ball Check
- 7,000 psi/483 bar
- For hand operated Grease Guns
- 1/8" BSPT

PL144 & PL145 PUSH ON BUTTON HEAD COUPLERS SUIT 16 mm & 20 mm BUTTON HEADS

Product Code	Description Press	
PL144	Push On 16 mm Button Head Coupler	6,000 psi
PL145	Push On 22 mm Button Head Coupler	6,000 psi

- · Push On Button Head Coupler for 16 mm and 22 mm Button Head Fittings.
- 6,000 psi/413 Bar
- 1/8" BSPT

PL146
GREASE ACCESSORY KIT
QUICK CONNECT 7 PCE

Product Code	Description No. of Piec	
PL146	Quick Connect Grease Gun Accessory Kit	7

- 7 pc Quick Connect Grease Guns accessory Kit Including :-
- Professional Recessed Lube Adaptor
- Grease Injector Needle s/s 38 mm long
- Professional 90 deg Angle Lube Adaptor
 Professional Narrow Needle Nose Adaptor
- Jaw Type Coupler to Seal Off Dispenser
- Regular Coupler to Right Angled Coupler
- Quick Connect Hose

PL150 - PL155 **GREASE GUN HOSES** STANDARD & HIGH PRESSURE

- High Pressure hoses are ideal for cold weather use
- All threads are 1/8" BSPT Standard Pressure Hose (OD = 8.5 mm, ID = 3.6 mm) High Pressure Hose (OD = 10.8 mm, ID = 4.1 mm)

PL157 GREASE GUN EXTENSION FLEXIBLE / RIGID COMBO

Product Code	Description	Pressure Rating
PL157	Flexible / Rigid Grease Gun Extension	5,000 psi

- 5000 psi / 345 Bar
- Converts Rigid Extn. To Flex. & vice versa
- Extends to 330 mm overall length

PL158 GREASE GUN EXTENSIONS BENT / STRAIGHT 2 PIECE PACK

Product Code	Description	Pressure Rating
PL158	Combo Straight and Bent Grease Gun Rigid	6,000 psi
	Extensions	

- Combo Pack
- Includes one 150 mm Bent Steel Extn. & one 100 mm Straight Steel Extn.
- Threaded 1/8" BSPT
- · 6000 psi / 413 Bar

PL159 GREASE GUN EXTENSION IN LINE SWIVEL JOINT

Product Code	Description	Threads
PL159	Grease Gun Extension Inline Swivel	1/8" BSPT Male x 1/8" Female

- · Grease Gun Extension Swivel
- 1/8" BSPT Male x 1/8" BSPT Female
- 3000 psi / 240 Bar
- All steel construction

PL160 GREASE GUN HOLDER SUITS 450 GRAM MANUAL GUNS

Product Code	Description	To Suit
PL160	Manual Grease Gun Holder	Suits 450 gram capacity guns

- Grease Gun Holder for 450 gram grease gun.
- · Simple snap action clamp for safe storage of grease guns
- · Steel construction, zinc plated finish

PL161 GREASE GUN HOLDER SUITS HIGH VIBRATION LOCATIONS

Product Code	Description	To Suit
PL161 Heavy Duty Manual Grease Gun Holder		Suits 400 and 450 gram capacity guns

- Heavy Duty Grease Gun Holder for high vibration environment
- · Works with both 400 gm capacity Grease Guns as well as 450 gram capacity Grease Guns
- · All Steel construction with a 4 bolt design for easy & secure mounting

PL162 LED LIGHT ATTACHMENT FOR GREASE GUNS

Product Code	Description	Includes	
PL162	LED Grease Gun Light	Batteries, Mounting Clip	

- · LED Grease Gun Light
- · Complete with batteries
- Includes mounting clamp that fits on Grease Gun Steel extension as well as flex hoses

PL163 **BULK LOADER / FILLER NIPPLE** (SPARE PART)

Product Code	Description	Note
PL163 Bulk Loader / Filler Nipple		Spare Part

- · Bulk Loader / Filler Nipple (Spare)
- (Spare part for Cartridge Grease Gun)
- 0.9mm diameter 1/8" BSPT

PL164
AIR RELEASE VALVE
(SPARE PART)

Product Code	Description	Note		
PL164	Air Release Valve	Spare Part		

- · Air Release Valve (Spare)
- (Spare part for Cartridge Grease Gun)
- · Vents air pockets in grease guns efficiently
- 1/8" BSPT

	PL190	Grease Fitting Easy Out Tool 1/8"-27	Small
Ī	PL191	Grease Fitting Easy Out Tool 1/4"-28	Large

- PL190 Small type hex size 5/16" & 3/8" (9mm)
- PL191 Large type hex size 3/8" (9mm) & 7/16" (11mm)

PL192 GREASE FITTING UNBLOCKER

Product Code	Description	Note
PL192	Grease Fitting Unblocker	Ideal for Toolbox

- · Opens clogged grease fittings and loosens hardened grease joints
- · Excellent for maintaining and protecting bearings, control arms, joints, king pins, etc.
- Tool has an all steel construction & is designed to be tapped with a hammer to force a light viscosity oil through the tool into the coupler & finally into the grease joint, breaking up and removing dirt and debris
- · Built-In Hand Guard for added safety in use
- · Flexible hose attachment reaches fittings in difficult areas
- Comes complete with grease coupler for connection onto the grease fitting and 2 spare seals for replacing the piston seals as they wear out

PL193 GREASE FITTING CAPS AVAILABLE IN 3 COLOURS

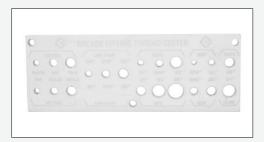

Product Code	Description	Pack Size
PL193R Red Grease Fitting Cap		50
PL193Y	Yellow Grease Fitting Cap	50
PL193B	Black Grease Fitting Cap	50

- Plastic Caps for Grease fittings are an easy way to keep contaminants out.
- These additionally help in colour coding the greasing points based on frequency of greasing or type of grease
- Designed with an inbuilt collar, these are most convenient in use & fit directly onto the greasing end of the fitting
- Made from a special plastic, these adjust to minor variations in fitting head diameter, as well
 as variations in temperature & practically fit all standard fittings designed for use with jaw type
 couplers
- Available in Black, Yellow and Red as standard with other colours that can be custom manufactured
- · Sold in packs of 50

PL194

GREASE FITTING THREAD TESTER

Product Code	Description	Note
PL194	Grease Fitting Thread Tester	Ideal for Toolbox

- · Great tool box accessory to sort out mixed fittings
- Aluminium construction with mounting holes
- Dimensions: 75mm x 207 mm
- Checks the tabulated 21 popular thread sizes

LUBE EQUIPMENT **BULK GREASE EQUIPMENT**

PL300 20 KG GREASE GUN LOADER PUMP

Product Code	Description	Dimensions
PL300	20 kg Grease Gun Loader Pump	Suits 310 mm Drum Covers

- Easy to use Grease filling solution to load bulk or combination grease guns from bulk grease pails
- Delivers 28 grams per stroke
- No mess or waste. Full economy in buying bulk grease
- Complete unit includes zinc plated pump with zinc die cast pump head and cast aluminium adjusting flange, drum cover follower plate & female loader fitting
- Brass piston rings mounted on zinc die cast piston for minimal wear
- Includes follower plate with rubber lining for use with tapered drums

RECOMMENDED USE

For Light & self Collapsing Grease up to and including NLGI 2

PL305 FOOT OPERATED GREASE PUMP

Product Code	Description	Stroke Capacity
PL305	10 kg Grease Kit	2 grams per stroke

- High Pressure Portable Grease Pump for quick effortless greasing in everyday lubrication such as greasing of excavators & other earth moving equipment, agricultural equipment, automotive
- Hands free operation; pump operates using the Foot Lever, which greatly reduces effort & allows high pressure greasing with highest comfort
- Can be operated by hand when under low machinery
- Economical, pump is operated by a single person & uses low cost bulk grease
- Designed with all moving parts submerged in the same grease which needs to be pumped, thereby staying lubricated at all times
- Moving parts create wave action in grease, auto removing air pockets & eliminating the use of a
- Pump delivers over 2 gms of grease per stroke & develops 8,700 psi (600 bar)
- Supplied with 2 metres of 1/4" hose
- Works with NLGI 1, 2 & 3 Greases

PL310 AIR OPERATED 50:1 RATIO GREASE PUMP (PUMP ONLY) SUIT 180 KG DRUM

Product Code	Description	To Suit
PL310	50:1 Ratio Air Assisted Grease Pump	Suits 180 kg Drums

- or use with 180 kg drums (PUMP ONLY)
- 4" (Female), Pump Outlet 1/4" (Female) BSPT
- ressure 30 150 psi.
- s Industrial High Pressure Grease pump with guaranteed performance & hassle
- enses Grease at pressures up to 50 times the Air inlet pressure
- to work in tough conditions
- se in Industry, workshop, farm, construction or as part of the Mobile Grease
- All metal construction, fully CNC machined with hardened wear resistant moving parts
- · Reciprocating piston operated 2.5" (63 mm) dia. Air Motor
- Fitted with strainer at suction tube inlet for clean grease to the bearing
- Flow 1.1Kg per minute free flow (dependant on grease proporities & temperature)
- · Maximum pressure at air inlet 2-10 bar (30-150 psi)

This page is part of a complete catalogue containing technical and safety data. All data must be reviewed when selecting a product. Pirtek reserve the right to change technical specifications without notice.

LUBE EQUIPMENT **BULK GREASE EQUIPMENT**

PL311

AIR OPERATED 50:1 GREASE RATIO PUMP (COMPLETE KIT) SUITS 180 KG DRUMS

Product Code	Description	To Suit
PL311	50:1 Ratio Air Assisted Grease Pump	Suits 180 kg Drums

- Suitable for use with 180 kg drums
- Air Inlet 1/4" (Female), Pump Outlet 1/4" (Female) BSPT
- Working Pressure 30 150 psi.
- World-class Industrial High Pressure Grease pump with guaranteed performance & hassle
- Pump dispenses Grease at pressures up to 50 times the Air inlet pressure
- Designed to work in tough conditions
- Ideal for use in Industry, workshop, farm, construction or as part of the Mobile Grease
- All metal construction, fully CNC machined with hardened wear resistant moving parts
- Reciprocating piston operated 2.5" (63 mm) dia. Air Motor
- Fitted with strainer at suction tube inlet for clean grease to the bearing
- Complete with 2 mtr of 1/4" of high pressure hose, Z Swivel, control valve, 24-1/2" drum cover & follower plate
- Delivers 1.1 kg per minute Free Flow (Dependant on grease properties and temperature)
- Maximum air inlet pressure 2-10 bar (30-150 psi)

PL315

AIR OPERATED 50:1 GREASE RATIO PUMP MOBILE 30 KG GREASE KIT

Product Code	Intended Use	Discharge Rate
PL315	Air Operated 30 kg Mobile Grease Kit	1.1 kgs per minute

- · World-class Industrial High Pressure Grease pump with guaranteed performance & hassle free
- · Pump dispenses grease at pressures up to 50 times the Air inlet pressure.
- · Designed to work in tough conditions ideal for use in Industry, workshop, farm, construction or as part of a Mobile Grease system
- · All metal construction, fully CNC machined with hardened wear resistant moving parts
- · Reciprocating piston operated 2.5" (63 mm) dia. Air Motor
- · Fitted with strainer at suction tube inlet for clean grease to the bearing
- Supplied complete with built-in Steel Drum, wheels & pull handle, Drum Cover, rubber lined Follower Plate, 2 meters of high pressure 1/4" Grease Hose, Z swivel & professional Grease Control Valve
- · Maximum air inlet pressure 2-10 bar (30-150 psi)

PL320 & PL321 **FOLLOWER PLATES** SUIT 20 KG / 180 KG DRUMS

Product Code	Intended Use	Dimensions
PL320	20 kg Drum Follower Plate	288 mm OD, 29.5 mm Grommet
PL321	180 kg Drum Follower Plate	602 mm OD, 29.5 mm Grommet

· Rubber Lined Follower Plate

PL330

GREASE CONTROL VALVE

Product Code	Contains	Inlet	
PL330	Control Valve with 150mm bent extension	1/4" BSPT Female Inlet Thread	

- · Premium quality grease control valve for use with air operated grease pumps
- · Provides continuous grease flow with trigger fully pressed
- Steel construction for durability & longevity
- · Ergonomically designed pistol handle
- · Comes complete with 6" steel extension & heavy duty coupler
- · Available as valve only
- Suited to underground coal mining (all steel construction)
- · 7500 psi / 517 Bar
- · Can be fitted with Z-Swivel (Refer PL340)

PL331

BOOSTER GREASE CONTROL VALVE

Product Code	Contains	Inlet
PL331	Control Valve with 150mm bent extension	1/4" BSPT Female Inlet Thread

- Heavy Duty Grease control valve with built-in pressure boost mechanism.
- · Provides continuous flow with pistol handle fully pressed
- Pressure boost achieved through repeated actuation of the pistol handle. Boosts line pressure from 6,000 PSI (400 BAR) to 10,000 PSI (690 BAR); extremely useful to unblock frozen grease fittings
- · Heavy Duty steel construction, provides durability & longevity
- · Ergonomically designed pistol handle
- Available as valve only
- Comes complete with 6" (150 mm) steel extension & coupler
- Suited to underground coal mining (all steel construction)
- Can be fitted with Z-Swivel (Refer PL340)

PL332

GREASE CONTROL VALVE INTEGRATED DIGITAL METER

PL340
GREASE 'Z' SWIVEL

Product Code	Description	Inlet
PL332	Grease Control Valve - Electronic	1/4" BSPT Female Inlet Thread

- · Premium quality Grease Control valve, for use with air operated grease pumps
- Built-In High Accuracy Digital Grease Meter for dispensing exact amount of grease
- Ability to measure amount of grease dispensed prevents both over & under lubrication & is invaluable in saving bearing failures
- Provides continuous grease flow, with trigger fully pressed
- Steel construction, provides durability& longevity. Meter uses oval gear technology
- Ergonomically designed pistol handle
- Comes complete with 6" (150mm) steel extension& heavy duty coupler
- Max pressure 8,000 psi / 550 Bar
- Unit of measure = Kgs
- · Batteries included

Product Code	Contains	Threads
PL340	10,000 psi 'Z' Swivel	1/4" BSPT Male / Female Threads

- Installed between the delivery hose & grease control valve, swivels permit easy handling of control valves and prevent damage to hose caused by twisting
- Swivels have a heavy duty steel construction with ball bearings for smooth operation and free unrestricted movement
- The swiveling joints are hardened for durability & wear resistance

PL341

HYDRAULIC COUPLER 3 JAW COUPLER FOR GREASE CONTROL VALVES

Product Code	Description	Pressure Rating
PL341	3 Jaw Coupler with Ball Check	7,500 psi / 517 Bar

- · Recommended for use with grease control valves
- Hardened coupler body & all internal parts withstand high dynamic pressures without deformation
- · Fully hardened reversible spring steel jaws for extended service life
- · Hexagonal nut for easy tightening
- · 100% pressure tested
- 1/8" BSPT (female)

BEKA MAX 20 20 POINT AUTOMATIC LUBE SYSTEM REGULAR PRECISE LUBRICATION SYSTEM

Product Code	Description	Capacity
BEKA MAX 20	Automatic Lube System	Can supply up to 20 points

KIT CONTENTS:

- 24V DC Pump Station
- · Onboard timer
- 4Kg Grease Reservoir
- 70 metres grease filled hose
- Reuseable hose ends
- Cable ties
- Hose wrapping
- Compression fittings and adaptors
- · Mounting nuts and bolts
- · Sufficient to supply 20 grease points automatically

The 24 volt DC BEKA-MAX pump is controlled by its own integral timer with adjustability for pump off time and pump on time. Grease is delivered through individual pump units to progressive distributors. A rotating charging arm in the reservoir forces grease downwards to the inlet of the pump element (maximum of 3) and via a high pressure hose to each progressive distributor.

The distributors apply grease to each connected bearing, and have a pressure capability of up to 280 bar. The system can be tested, or an additional lubricating cycle can be achieved, with a manual push-button switch.

The progressive distributor element is of modular construction and consists of between 3 and 10 elements; different sizes of distributor-element are provided to enable a wide variety of bearings to be greased. The modular construction of this unit enables the number of outlets to be increased or decreased simply, according to your technical specifications. In the event of a progressive distributor blockage, for example caused by excessive back pressure at the bearing, warning will be given. The design and construction of this powerful piston pump, when matched with the progressive distributors, enables it to operate reliably with greases up to NLGI class 2. Effective for ambient working temperatures between -35°and +80°C

The system provides automatically the exact amounts of grease, and is therefore the ideal lubrication for commercial vehicles.

The significant advantages of centralised grease lubrication with BEKA-MAX are as follows:

- Because the grease is carefully measured, wastage is kept to an absolute minimum- environmentally friendly
- \bullet A reduction in wear of component parts results in lower material and repair costs
- Bearing failure leading to loss of production is eliminated
- · The working life of machine parts is extended significantly
- · Manual lubrication is eliminated saving hundreds of labour hours over the life of the vehicle

Choose between fully automated, semi automatic or fully manual systems

• Fast and efficient • No points can be missed • Bearings last longer • No climbing or crawling - safer

Save the environment and your plant. Up to 5 times the amount of liquid grease- for example NLGI class 00- is required to provide the same lubrications performance as NLGI class 2. Hot weather, frequent wash down and dust make the problem worse.

LUBE EQUIPMENT OIL PUMPS

PL400

LEVER ACTION DRUM PUMP TO FIT 20 - 205 LITRE DRUMS

Product Code	Description	Capacity
PL400	Lever Action Drum Pump with NBR seals	300 ml per stroke

- Most popular pump design, engineered for professional use
- Powder coated steel pump body with ribbed section aluminum die cast pump head for maximum
- Built-in 1.1/2" & 2" bung for use on drums with either openings
- Plated steel lever handle with rubber grip for convenience
- Wear resistant Brass piston rings fitted onto zinc die cast piston
- Comes complete with curved metal spout & telescopic suction tube for use on 50 litre 205 litre
- Suited to oil based fluids, heating oils, motor oils, heavy and light oils, kerosene and diesel
- Not suited for water based fluids, solvents, acids, anti-freeze, or petrol

PL401

CLEAR TUBE LEVER ACTION DRUM PUMP

TO FIT 20 - 205 LITRE DRUMS

Product Code	Description	Capacity
PL401	Clear Tube Lever Action Drum Pump	300 ml per stroke

- Professional Barrel pump for pumping all types of oils
- Tough & Impact Resistant Polycarbonate tube with die cast aluminum adaptors
- Ribbed section Aluminum Die Cast pump head for maximum strength
- Nitrile Rubber Piston rings for smooth operation
- Built-in 1-1/2" & 2" bung for use on drums with either opening
- Delivers 300 ml (10 oz.) per stroke
- Comes complete with curved metal spout & telescopic suction tube for use on 50 litre 205 litre
- Suited to oil based fluids, heating oils, motor oils, heavy and light oils, kerosene and diesel
- Not suited for water based fluids, solvents, acids, anti-freeze, or petrol
- Transparent barrel facilitates monitoring of lubricant cleanliness

PL402 PROFESSIONAL ROTARY DRUM PUMP TO FIT 20 - 205 LITRE DRUMS

Product Code	Description	Capacity
PL402	Professional Rotary Drum Pump	250 ml per turn

- Most popularly used pump worldwide.
- The Pirtek version of the Rotary Pump is superior to any other with features such as Dual Directional Operation which allows the pump to both empty, as well as refill containers
- Extremely Heavy Duty & rugged weighing 6.6 kgs (14.5 lbs)
- Pump body is sturdy cast iron with precisely machined cast iron vanes for better draw & smoother delivery
- Pump seals are made from Viton
- Fits 50 litre to 205 litre barrels
- 1" threaded inlet at base of pump housing
- Comes complete with suction tube, 2" cast iron bung nut & discharge spout
- NOTE: Add 30 ml of the fluid to be pumped into the pump outlet to assist priming when transferring low viscosity fluids such as kerosene or diesel

LUBE EQUIPMENT MANUAL OIL PUMPS AND GUNS

PL404

EZEE FLOW DOWNSTROKE PUMP FOR 20 LITRE DRUMS

Code	Becompain	Supusity
PL404	Ezee Flow Downstroke Pump	18 strokes per litre (56 ml per stoke)
	gineered for trouble free use on 5 gallo	n / 20-25 litre containers with plastic

- · Downstroke operation with fluid discharge when pushing the handle down. Enhanced ease of use & reduced fatigue especially when pumping heavy fluids. It additionally reduces pull out stress on the pump bung
- Heavy duty steel suction tube, with the pump head made from high density polyethylene. Pump head incorporates nozzle holder & option to drain back over flown fluid into the container
- Interchangeable bung adaptors. The standard bung adaptors can be slid over the pump, when using on containers with external threading. Alternatively, when using the pump on pails with plastic pull out Rieke® spout, the other bung adaptor for Rieke® spout can be used. Choice of 7 adaptors makes the pump good for use with most metal & plastic containers
- Pump length can be extended by over 100 mm for use on extra depth containers, by conveniently sliding the suction tube extender
- Supplied complete with rigid steel discharge spout & 1200 mm long spring reinforced non kinking discharge hose fitted with non drip spout

PL410, PL411 & PL412 MANUAL OIL SUCTION GUNS STEEL OR POLYCARBONATE BARREL

Product Code	Description	Capacity
PL410	Manual Oil Suction Gun Black Barrel	500 ml
PL411	Manual Oil Suction Gun Clear Barrel	500 ml
PL412	Manual Transfer Gun - 2 vinyl tubes	350 ml

- Rugged transfer guns designed for use with gear oils to get them both into and out of gear boxes, transfer cases and differentials
- Deluxe lip seal provides maximum suction
- Steel Barrel in premium powder coated finish (PL410 & PL412)
- Clear polycarbonate barrel for oil condition monitoring (PL411)
- Aluminium Die cast Head
- Fully serviceable

Product

- Needs no priming
- Suitable for use with non corrosive liquids

SUCTION GUNS

- · Supplied with 300 mm of clear vinyl suction tube TRANSFER GUN
- · Supplied with 1200 mm of clear vinyl tube for each valve

PL414
MANUAL OIL LEVER GUN

Product Code	Description	Capacity
PL414	Manual Oil Lever Gun	500 ml - 10,000 psi

- · Heavy Duty Oil Gun handles flowable greases & light oils without leakage
- High Quality Steel Barrel with fully machined seam for leak proof operation
- Grease Gun Follower designed for use with both Oils & Grease & works with 14 oz. (400 gm) Grease cartridge or 500 cc Bulk without the need to flip the follower
- Develops up to 10,000 psi / 690 bar
- Variable stroke feature built in for use in confined areas
- High Tolerance Aluminum Die Cast Gun Head
- Complete with a 150 mm steel extension & professional 4 jaw coupler with ball check

LUBE EQUIPMENT OIL PUMPS AND DISPENSING

PL417

PREMIUM OIL SPIGOT/DISPENSER

Product Code	Description	Thread
PL417	Oil Spigot/Dispenser for Air Operated Oil Pumps	1/2" BSP Female

- · Professional quality Oil Spigot in premium chrome plated finish
- · Used to construct oil bars or direct with air operated oil pumps as a dispenser
- Spring loaded dispensing mechanism CNC machined for non-drip operation
- · Nitrile Seals
- Handles up to 800 psi (55 bar)

PL430 - PL435 AIR OPERATED OIL PUMPS 1:1 3:1 5:1 RATIOS

Product Code	Ratio	Description	Flow Capacity litres / min
PL430	1:1	Air Operated Oil Pump Stub Version with Bung	42
PL431	1:1	Air Operated Oil Pump complete to suit 205 litre drums	42
PL432	3:1	Air Operated Oil Pump Stub Version with Bung	14
PL433	3:1	Air Operated Oil Pump complete to suit 205 litre drums	14
PL434	5:1	Air Operated Oil Pump Stub Version with Bung	18
PL435	5:1	Air Operated Oil Pump complete to suit 205 litre drums	18

NOTE: All pumps have 1/4: BSP air inlet, 1/2" BSP Female oil outlet, 1" BSP Female Suction Tube thread

1:1 Ratio Pumps

- Transfer pump, used to quickly transfer oils from large drums to smaller containers. These have a Double Acting operation with discharge up to 40 lpm (8.80 imp. gpm).
- Ideal for use with low to medium viscosity (up to SAE 80 Oils) for transferring over short distances (5 metres)
- Air Consumption: 270 lpm (59.40 imp. gpm), max air pressure 115 psi / 8 Bar

3:1 Ratio Pumps

- Amongst the most popular general purpose air operated pumps worldwide
- Pumps are single acting with discharge up to 14 lpm (3.08 imp. gpm)
- Ideal for use with medium to high viscosity oils (up to SAE 130) for transferring over distances (up to 30 metres), mostly used with Trolley mounted kits
- Air Consumption: 230 lpm (50.60 imp. gpm), max air pressure 115 psi / 8 Bar

5:1 Ratio Pumps

- High Pressure air operated pumps for dispensing oil at 5 times the pressure as the air inlet
- Pumps are double acting with discharge up to 18 lpm (3.96 imp. gpm)
- Ideal for use with high viscosity oils (up to SAE 240) for transferring over short & long distances (up to 50 metres), mostly used with Trolley mounted kits both with & without Hose Reels, as well as with fixed systems for centralized distribution
- Air Consumption: 250 lpm (55.0 imp. gpm), max air pressure 115 psi / 8 Bar

NOTE: Wall Mounting brackets and IBC mounting kits available

PL440 DIE CAST DRUM BUNG INTEGRATED WING NUT

Product Code	Description	Size
PL440	Die Cast Drum Bung	42 mm Inside Diameter

- Aluminum Die cast 2" Drum Bungs for use primarily with Air Operated Pumps
- Bungs can be adjusted anywhere on the suction tube & tightened using the Wing Nut
- · Zinc Die cast Locking Nut inside holds the suction tube
- · 42 mm Inside Diameter
- · Standard equipment on all Pirtek Air Operated Oil Pumps

PL450 MECHANICAL OIL METER

Product Code	Description	Measurement Range
PL450	Mechanical Oil Meter	1 - 30 litres / minute

- High pressure positive displacement meter suitable for in-line and end of line applications
- · Oval gear mechanism for optimum accuracy
- · High reliability Mechanical Display
- · Robust Aluminum Die Cast construction with protective shroud on meter
- Accuracy ± 1%
- Repeatability ± 0.2%
- Measures Litres with Reset capability
- RECOMMENDED USE
- Oils with viscosity up to 2000 cSt, Diesel, Biodiesel
- DO NOT USE WITH
- Water based media, Petrol etc.
- Max pressure 1000 psi / 70 Bar
- 1/2" BSP Female
- · Bottom entry, top outlet

PL451 ELECTRONIC IN-LINE OIL METER

Product Code	Description	Features
PL451	Electronic Digital in-Line Meter	1-30 litres /min at up to 70 bar WP

- · High pressure positive displacement meter suitable for in-line and end of line applications
- · Oval gear mechanism for optimum accuracy
- Electronic Display using two 1.5V batteries
- · Robust Aluminium Die Cast construction
- · Measures in Litres, Quarts, Pints & Gallons
- Accuracy ± 0.5%
- Repeatability ± 0.3%
- · Easy user re-calibration
- · Working Pressure 70 bar Burst Pressure 140 bar
- · Pressure Loss 0.7 bar
- Max. Resettable Batch Total 99,999 units
- Non-Resettable Totalisator 9,999,999 Units
- · Least Count Resolution 0.001 Units
- · Water Resistance IP55
- Temp. Range: -10°C to +60°C
- 1/2" BSPT inlet & outlet threads
- · Bottom entry, top outlet
- · Batteries included

RECOMMENDED USE

• Oils with viscosity up to 5000 cSt, Diesel, Biodiesel

DO NOT USE WITH

- · Water based media, Petrol etc.
- Not approved for metering commercial sales of media

PL460 OIL CONTROL GUN WITH SWIVEL c/w NON DRIP NOZZLE

Product Code	Description	Features
PL460	Oil Control Gun with Swivel / Nozzle	Up to 70 litres /min and 60 bar WP

- For use with Air Operated Oil Pumps up to 6:1 Pressure ratio
- · Gun dispenses by simple press of the trigger
- Built-in safety clip can be slid over the trigger for continuous un-attended dispensing; or alternatively under the trigger to lock & prevent accidental dispensing
- Slim construction of the steel outlet spout allows the gun to be used to fill small openings
- Built-in swivel threaded at inlet for easy maneuverability
- · Standard configuration includes steel outlet extension and non drip nozzle
- Temp. Range: -10°C to +60°C
- 1/2" Female BSPT Swivel Inlet
- 1/2" OD Steel Extension

RECOMMENDED USE

- · Oil, Gear Lube, ATF
- DO NOT USE WITH
- · Water based media, Petrol etc.

PL461 MECHANICAL OIL CONTROL GUN WITH SWIVEL

Product Code	Description	Features
PL461	Mech. Oil Control Gun with Swivel / Nozzle	0.3 to 8 litres /min and 60 bar WP

- · High accuracy light weight gun for controlling fluid deliveries in most demanding applications
- · Oval gear mechanism for optimum accuracy
- Accuracy ± 1%
- · Repeatability ± 0.2%
- Temp. Range: -10°C to +60°C
- Max. Resettable Batch Total 99,999 units
- · Non-Resettable Totalisator 9,999,999 Units
- · Least Count Resolution 0.1 Units
- · Water Resistance IP55
- · High Reliability Mechanical display
- · Aluminum Die cast meter body
- Gun with Impact & Weather resistant nylon construction
- Built-in safety clip can be slid over the trigger for continuous un-attended dispensing; or alternatively under the trigger to lock & prevent accidental dispensing
- Built In swivel at inlet for easy maneuverability
- Supplied complete with rigid steel or hose extension, fitted with manual non drip nozzle RECOMMENDED USE
- RECOMMENDED USE

 Oils with viscosity up to 2000 cSt, Diesel, Biodiesel
- DO NOT USE WITH
- · Water based media. Petrol etc.

PL462 ELECTRONIC OIL CONTROL GUN WITH SWIVEL c/w NON DRIP NOZZLE

Product Code	Description	Features
PL462	Electronic Oil Control Gun with Swivel / Nozzle	1 to 30 litres /min and 60 bar WP

- · High accuracy light weight gun for controlling fluid deliveries in most demanding applications
- · Oval gear mechanism for optimum accuracy
- Accuracy ± 0.5%
- Repeatability ± 0.3%
- Temp. Range: -10°C to +60°C
- · Max. Resettable Batch Total 99,999 units
- Non-Resettable Totalisator 9,999,999 Units
- Least Count Resolution 0.1 Units
- Water Resistance IP55
- · Electronic Display using two 1.5V batteries
- Aluminum Die cast meter body
- Gun with Impact & Weather resistant nylon construction
- Built-in safety cum continuous Flow lever can be slid over the trigger for continuous unattended dispensing; or alternatively under the trigger to lock & prevent accidental dispensing
- · Built In swivel at inlet for easy maneuverability
- · Measures in Litres, Quarts, Pints & Gallons
- · Easy user re calibration
- Supplied complete with rigid steel extension or hose extension, fitted with manual non drip nozzle
- · Batteries included

RECOMMENDED USE

· Oils with viscosity up to 5000 cSt, Diesel, Biodiesel

DO NOT USE WITH

· Water based media, Petrol etc

LUBE EQUIPMENT

OIL ACCESSORIES

PL465 OIL METER SWIVEL

Product Code	Description	Threads
PL465	Oil Meter Swivel	1/2" BSPT Male - Female

- · Swivel Adaptor for Oil Meters / Hose End Guns
- Large 1/2" (13 mm) inner dia. for least resistance to flow
- Steel construction with bright zinc plated finish
- Threaded ½" BSPT (M) x ½" BSPT (F)
- 103 bar(1,500 psi) rating

PL466 AUTOMATIC NON DRIP NOZZLE

Product Code	Description	Threads
PL466	Automatic Non Drip Nozzle	1/4" BSPT Female

- · Commoly used with metered oil control valves / hose end guns
- Used either with steel extensions or hoses at discharge end to cut off media supply, once filling is complete
- These have a steel construction, using NBR seals
- Automatic Non Drip Nozzle, designed with multiple check valves to achieve absolute non drip.
- The nozzle opens automatically under fluid pressure; and closes automatically with the release of pressure.
- The discharge end has a narrow section allowing the nozzle to dispense into small openings.
- · Designed to minimize pressure loss
- Threaded 1/4" BSPT Female

PL467 200 MM FLEXIBLE HOSE EXTENSION

Product Code	Intended Use	Threads
PL467	200 mm Flexible Hose Extension	1/2" BSPT Male - 1/4" BSPT Male

- Flexible Oil Hose Extension for use with Oil Control Guns
- Max. Working Pressure 2,320 psi (160 bar)
- Overall Length 8" (200 mm)
- Hose Inner Dia. 1/2" (12. 7 mm)
- Fittings:1/2" BSPT (M) x 1/4" BSPT (M)

PL470 ELECTRIC OIL PUMP

Product Code	Description	Flow Capacity
PL470	Electric Oil Pump	Up to 11 litres / min and 4.5 bar

- Heavy Duty Oil pump designed specifically to transfer bulk oils, hydraulic fluid, antifreeze or antifreeze mixes
- Non corroding Aluminium Die cast pump body
- A high horsepower to flow ratio assures adequate power to pump viscous fluids at low temperatures
- · Self priming, positive displacement design
- Pump has an internal bypass valve to bypass flow, if the discharge pressure exceeds the bypass valve setting
- Built-In 2" Bung Adaptor for mounting on drums/ tanks
- · Air Cooled Motor with Thermal Protection
- · Can be used to transfer Used oil with a screen fitted onto the Suction
- Flow: Up to 6.5 GPM (25 lpm)
- Motor: Heavy Duty 1/2 HP 220V AC, 50 Hz.
- · Amp: 6 Amp
- RPM: 2800
- Construction pump housing: Aluminum Die Cast
- · Mechanism: Gear Pump
- · Gear Material: Sintered Powder Metal
- · Internal bypass valve: Yes
- Suction Tube: Supplied to suit 50 to 205 litre drums
- Delivery hose: 3/4" ID x 2.4 m long
- Bung Adaptor: 2" Threaded BSPT
- Inlet: 1" NPT
- Outlet: 3/4" NPT
- · Dispensing Nozzle: Ball Valve
- Power Cable: 760mm (30")
- · Air Cooled: Yes
- Max. Viscosity of Oil: SAE 90
- Max. Working Pressure: 65 psi (4.5 bar)
- Thermal Protection: Yes

RECOMMENDED USE

 Oils, Synthetic Oils, Antifreeze, Used Oil, Hydraulic Fluids, Cutting Oils, Oil based Herbicides, Non Flammable Oil Based Solvents, Liquid Soap etc.

PL480 & PL481 METAL OIL CANS

SUPPLIED WITH BOTH RIGID AND FLEXIBLE SPOUTS

Product Code	Intended Use	Oil Capacity
PL480	Lever Type with Brass Pump	300 ml
PL481	Lever Type with Brass Pump	500 ml

- Spout Length 125 mm (Rigid) or 150 mm (Flexible)
- All steel construction, with the body seamless drawn from tin coated sheet in premium powder coated finish
- · Brass pump has 2 ball valves for large volume delivery per stroke.
- The suction valve at the bottom of pump is without spring, which prevents malfunctioning because of sticking valve due to resinous oil

PL482 PLASTIC BODY OIL CAN

Product Code	Description	Capacity
PL482	Plastic Body Oil Can	215 ml

- · Unbreakable & rust resistant Plastic body Oil Cans
- · Graduations marked on the bottle in both ml & oz.
- · Oil discharge is through the 'squeeze action' of the Oil can bottle.
- · Comes complete with telescopic steel tube with brass nut & non drip tip
- 150 mm spout length

PL484 & PL485 PLASTIC FUNNELS ANTI-SPLASH & SPILL PROOF

Product Code	Description	Capacity	Major Diameter	Spout Length
PL484	Plastic Funnel	1.7 litre	205 mm	170 mm
PL485	Plastic Funnel with Drum Adaptor	3 litre	240 mm	245 mm

- · Heavy Duty Polypropylene construction
- · Designed with special contours in the funnel body for easy handling
- · Anti-splash and spill proof, with rim of the funnel curved in
- · Complete with Wire Mesh Screen Dust Cover & flexible spout
- PL485 with drum Bung Attachment allows the funnel to be mounted direct onto drums with 2" threaded opening
- · Manufactured in translucent white to give a clear view of media

PL487, PL488 & PL489 PLASTIC MEASURES WITH SPOUTS

Product Code	Description	Capacity
PL487	Plastic Measure with Lid and Spout	1 litre
PL488	Plastic Measure with Lid and Spout	2 litre
PL489	Plastic Measure with Lid and Spout	5 litre

- · Manufactured in translucent white to give a clear view of media
- · Plastic Measures have a translucent High Density Polyethylene construction & are used for transferring metered quantity of fluids
- · They are marked in both litres and quarts
- · Come complete with a Polyethylene flexible spout with cap and polypropylene lid
- · Note: Measures are not to be used as the basis of commercial transactions

LUBE/FUEL EQUIPMENT

OIL ACCESSORIES - WASTE OIL COLLECTION

PL490 WASTE OIL DRAIN

Product Code	Description	Bowl Capacity	Collection Capacity
PL490	Waste Oil Drain Collector	10 litres	55 litres

- Tank Capacity: 68 Litre
- Bowl inner Diameter : 355 mm
- · Length of draining Hose: 2 metres
- Maximum Height: 1828 mm
- Minimum Height: 1143 mm
- Recommended Draining Pressure: 0.5 bar
- Oil Drain with wheel mounted tank for gravity draining of motor, engine, gearbox & differential
 oils, transmission & power steering fluids etc. from all types of motor vehicles placed on auto
 lift or a pit
- Centrally Mounted 10 litres capacity bowl is height adjustable & can be optimally positioned allowing oil draining as well as other maintenance operations
- Durable all-steel design and reinforced castors; the unit provides a safe & affordable option for draining, transferring & evacuating used oil
- Designed for excellent mobility, easy bowl positioning & simple to use pressurized evacuation
- Comes complete with a 355mm diameter telescopic bowl that can be adjusted from 1143 mm to 1828 mm
- 68 litre tank includes a preset air regulator that allows the use of standard compressed air up to 10 bar
- Tank includes a safety valve and a reinforced dispensing hose that doubles as a sight gauge to
 prevent overfilling
- · Not for use with fuels and corrosive media

PL500

INDUSTRIAL ROTARY FUEL TRANSFER PUMP

Product Code	Description	Flow Rate	Media
PL500	Industrial Rotary Fuel Transfer Pump	38 LPM	Most Fuels & Solvents

- FM Approved Pump for use with Class 1 & Class 11 flammable & combustible liquids
- Solid Cast Iron construction, with Sintered powdered 3 vane rotor c/w 3 Graphite vanes
- · Flow 38 LPM, Self Priming
- Delivers media with a Head Lift of 6m (20 ft)
- Telescopic Suction Tube with strainer to use with 50 -205 L Drums c/w 2" bung
- Outlet: 2.4 m x 3/4" Antistatic hose, vaccum breaker, Non sparking aluminium Nozzle
- · Nozzle holder
- Recommended use: Petroleum based fluids, Petrol, Diesel, Biodiesel, Ethanol blend (up to 15%), Kerosene, Naphtha, Alcohols, & other solvents compatible with the pump components
- Ideal for Barrels, Drums & tanks for quickly refueling diesel powered vehicles & Equipment
- · Do Not use with water based media

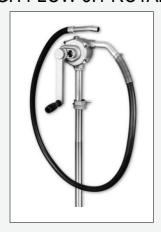

FUEL EQUIPMENT FUEL PUMPS

PL503

HIGH FLOW 3:1 ROTARY BARREL FUEL PUMP

Product Code	Description	Flow Rate	Media
PL503	Industrial Rotary Fuel Transfer Pump	38 litres per minute	Most Fuels & Solvents

- · Flow: Dispenses 205 Litres in 3 Minutes
- Die cast Aluminium construction with sintered gear driven die cast zinc rotor & vanes
- Geared Rotary barrel pump with 3 times discharge per rotation for every complete handle turn, the rotor turns 3 times
- · Aluminium die cast handle with security locking latch
- Complete with 3 piece Suction tube 50 205 L drums c/w Bung
- · Discharge hose 1.8M length
- Recommended use: Petrol, Diesel, Kerosene & lubicating Oils up to SAE30
- DO NOT use with corrosive liquids, Solvents, Acids, Alkalis etc.
- NOTE:- Fuels Containing Ethanol & Biodiesel will cause more frequent replacement of rubber parts
- <u>NEVER</u> operate the pump near fire or source of spark. Some media may be explosive & dangerous to pump

PL510 & PL511 12V & 24V DC ELECTRIC DIESEL PUMPS

	Product Code	Description	Flow Rate	Media
PL510		12VDC Electric Diesel Fuel Pump	46 litres per Minute	Diesel Fuel
	PL511	24VDC Electric Diesel Fuel Pump	46 Litres per Minute	Diesel Fuel

- 12V DC or 24V DC Electric Diesel Fuel Pump
- · Self Priming Vane Pump
- Portable Diesel transfer pump for every day use
- Light weight non corroding Aluminium Die cast contruction
- Motor 1/4 HP
- · Amp Draw from battery: 12 Amp & 8.7 Amp respectively
- Flow Rate 46 LPM
- · Duty Cycle: 30min On / 30 Min OFF
- Max Working pressure 4.5 bar (65 PSI)
- Supplied with 4M hose to cut for both suction and Delivery Hardware included: 3 hose Barbs (3/4"), & 4 Hose clamps Battery cable 2m length with fuse and clamps
- · Aluminium Nozzle for delivery of fluid
- · Recommended use : Diesel & Kerosene
- DO NOT Use with fluids with a Flash Point below 38°C such as Petrol & Alcohol: - Sparking could result in explosion and fatal injury

FUEL EQUIPMENT FUEL PUMPS

PL515 ELECTRIC FUEL AND OIL PUMP 230V AC

Product Code	Description	Flow Rate	Media
PL515	Electric Fuel & Oil Pump 230V AC	38 litres per minute	Most Fuels & Solvents

- · Motor Double Insulated, safe to use with Water Emulsions
- · Manufactured from chemically inert materials : POM
- · Polypropylene, Stainless Steel, Nitrile Rubber, Viton & PTFE
- Working temperature range -10deg C to + 40deg C
- Flow rate: 40 LPM (measured at outlet)
- · Motor 0.43 HP Centrifugal AC motor
- · Internal by-pass valve : No
- · Duty Cycle : Continuous Cycle
- · Maximum Viscosity 114 cSt
- Built in anti-siphoning system ensures that the media does not flow out by siphon action in case of accidental damage to delivery hose or dispensing nozzle
- Built in bung adaptor to fit directly onto drum with 2" threaded opening
- Suction hose 3/4" x 1 mtr complete with stainless steel strainer
- Discharge hose 3/4" x 3 mtr long
- Dispensing nozzle 3/4" polypropylene c/w 3/4" hose barb
- · Power cord: 2 mtr long
- Recommended Use: Diesel, Kerosene, Mineral & Synthetic Oils, Antifreeze, Water & Emulsions
- DO NOT Use with fluids with a flash point below 38deg C such as Petrol & Alcohol: - Sparking could result in an explosion causing fatal injury

PL517 ELECTRIC FUEL PUMP EXPLOSION PROOF 12V DC

Product Code	Description	Flow Rate	Media
PL517	Electric Fuel Pump Explosion Proof 12V DC	Up to 75 litres per minute	Most Fuels & Solvents

- Heavy Duty Industrial Grade High Flow Fuel Pump
- cUL, ATEX & IECEx listed motor
- Aluminium die cast construction, Geared pump design using sintered metal gears. Makes the pump tolerant to contaminants in fuels as well as tremendous suction and minimal noise
- · Duty Cycle: 30 minutes ON / 30 minutes OFF
- · Flow Rate: up to 75 LPM
- Explosion proof motor: 1/4 HP 12V DC
- · Current Draw: 15 AMP
- · Suction Pipe: steel
- Hose: 1" x 3.6 mtr antistatic hose
- Tank adaptor: 2" threaded spin collar for easy installation
- Inlet: 1" NPT
- Outlet: 1" NPT
- · Wire mesh strainer fitted into body of pump for easy cleaning
- · Dispensing nozzle: 1" manual with swivel
- · Battery cable: 4.5 mtr
- · Recommended use: Petrol, Diesel, E15 fuel, Kerosene, Bio-Diesel (B20)

FUEL EQUIPMENT FUEL SPARE PARTS & FUEL GUNS

PL520 & PL521 SPARES FOR FUEL PUMP PL500

Product Code	Description	Includes	Also
PL520	Spares for Fuel Pump PL500	Gasket, Vanes, Springs	Complete Set
PL521	Spares for Fuel Pump PL500	Bung nut	c/w Flame Arrestor

Kit Includes:

- Pump head gasket
- Graphite Vanes: (3)
- · Vane Springs: (3)
- · Shaft nut , packing & packing nut

PL530 & PL531 MANUAL FUEL CONTROL NOZZLES

Product Code	Description	Flow Rate	Media
PL530	Manual Fuel Control Nozzle Unleaded Fuel Use	57 litres per Minute	Unleaded Fuel
PL531	Manual Fuel Control Nozzle Diesel Fuel Use	75 Litres per Minute	Diesel Fuel

- · All metal Aluminium Die cast consruction
- · Inlet: 1" BSP Aluminium hose swivel
- Outlet discharge spout :- 3/4" diameter x 160mm long (for Petrols) 1" diameter x 160mm long (for Diesel)
- Maximum flow rate : 57 LPM (Petrol), 75 LPM (Diesel)
- · Maximum pressure: 3.45 Bar (50 psi)
- · For use with Electric Fuel pumps & Gravity feed
- · Recommended use: All Petrols, Ethanol blends (up to 15%), Kerosene, Diesel, Biodiesel

PL540 & PL541 AUTOMATIC HIGH FLOW FUEL CONTROL NOZZLES

Product Code	Description	Flow Rate	Media
PL540	Automatic Fuel Control Nozzle Diesel Fuel Use Only	75 litres per Minute	Diesel Fuel
PL541	Automatic Fuel Control Nozzle Petrol Fuel Use Only	57 Litres per Minute	Unleaded Fuel

- Aluminium Body, Trigger & Guard from Thermoplastic
- Sensor built in to the discharge spout outlet automatically shuts off supply once fuel level in the tank reaches that of the outlet spout
- For use with electric fuel pumps, Duel mode Manual & Automatic
- Inlet: 1" BSP (F). Diesel (PL540) 3/4" BSP (F) Petrol (PL541)
- Outlet spout straight :- 27mm OD (1.06") diameter (for Diesel) 21mm OD (0.83") diameter (for Petrol)
- Maximum pressure :- 3.45 Bar (50 Psi)
- · Recommended use: All Petrols, Ethanol blends (up to 15%), Kerosene, Diesel, Biodiesel

FUEL EQUIPMENT

FUEL GUNS & METERS

PL550

METERED FUEL CONTROL NOZZLE

Product Code	Description	Includes	Media
PL550	Metered Fuel Control Nozzle	Electronic Display	Diesel, Petrol, Biodiesel, Water

- · Metered Fuel Control Nozzle
- · Aluminium Die Cast Nozzle Body
- Polyamide body & sealed electronic card
- Inlet: 1" BSP (F) swivel
- · Stainless Steel Adaptor included to convert Male to Female end
- Flow: 5 to 120 LPM
- Maximum Working Pressure: 10 Bar (150 psi)
 Working Temperature Range: -10°C to 50°C
- Sealed Electronics Display using Two x AAA 1.5V batteries (included)
- Water Resistance : IP55
- Maximum Resettable Batch Total: 99999 units
 Maximum Non Resettable Totalizer: 999999 units
- Least Count / Resolution: 0.001 units
- Accuracy: + / 1%
- Repeatability: + / -0.30%
- · Maximum Viscosity of media: 5.35 cst
- Recommended use: Diesel, Petrol, Bio-Diesel, Windshield Fluid, Water
- DO NOT use with Oils & Ethanol (incl. blends)
- · NOT to be used for Media for RESALE

PL560

MECHANICAL NUTATING DISC FUEL METER

Product Code	Description	Includes	Media
PL560	Mechanical Nutating Disc Fuel Meter	Mechanical Display	Diesel, Petrol, Biodiesel, Oil

- · Mechanical Nutating (wobble plate) Disc Fuel Meter
- · Robust Aluminium Construction
- · Nutating disc mechanism offers high tolerance to fuel contamination
- For use with Electric Fuel pumps or Gravity flow (with a minimum gravity head of 1.2m)
- · Port size: 1" BSP (F)
- 3 Port design which allows the meter to be fitted in line or with the inlet outlet ports at right angle
- Register cap can be easily removed & rotated to every 90° orientation for display reading
- Flow Rate: 15 to 75 LPM
- · Maximum Working Pressure: 3.5 Bar (50 Psi)
- Working Temperature Range: -10°C to +65°C
- Maximum Resettable Batch Total: 9999 Litres
- Maximum Non Resettable Totalizer: 999999 Litres
- · Least Count Resolution: 0.10 Litres
- · Accuracy: +/- 1%
- Repeatablity: +/- 0.50%
- · Recommended use: Diesel, All Petrols, Biodiesel, Low to medium Viscosity Oils
- DO NOT use with water based fluids

FUEL EQUIPMENT FUEL METERS & FUEL FILTERS

PL561 DIGITAL TURBINE METER

Product Code	Description	Features	Media
PL561	Digital Turbine Meter	Electronic Display	Diesel, Petrol, Biodiesel, Water

- · Polyamide body & sealed electronic card
- · Electronic Display can be rotated in 4 different positions
- Electronic Display uses two x AAA 1.5V batteries (included)
- Inlet / Outlet: 1" BSP (M) (Stainless steel Female socket included)
- Maximum Working Pressure : 20 Bar (300 Psi)
- Flow: 5 to 120 LPM
- Temperature Range : -10°C to +50°C
- · Maximum Resettable Batch Total: 99999 units
- · Maximum Non Resettable Totalizer: 999999 units
- Accuracy: + / 1%
- Repeatability: + / 0.30%
- · Water Resistance: IP55
- · Recommended use: Diesel, Petrol, Bio-Diesel, Windshield fluid, Water
- <u>DO NOT</u> use with Oil

PL570 & PL571

FUEL FILTER 1" BSP & REPLACEMENT ELEMENT

Product Code	Description	Flow Rate	Media
PL570	PL570 Fuel Filter 1" BSPP		Diesel & Petrol Fuels
PL571	Fuel Filter - Replacement Element	10 Micron Paper	Diesel & Petrol Fuels

- · Fuel Filter 1" BSP (F)
- · High Flow Filter with 10 Micron Paper Element fitted
- · Aluminium Die cast head
- · Translucent Polypropylene Filter Bowl c/w Brass drain cock
- Removes Small particles of Rust, Dirt, Scale, Grit, Sand & lint at gravity flow 19 Litres / minute with only 600 mm head
- Maximum Working Pressure : 10 Bar (150 Psi)
- Recommended use : Diesel and Petrol
- <u>DO NOT</u> use with water based products, Ethanol blend fuels, Avaition Fuels, Race Fuels etc.
- · Replacement Filter Element PL571

PL572 FUEL FILTER WRENCH

Product Code	Description	Features	Material
PL572	Fuel Filter Wrench	Fuel Filter PL570	Reinforced Nylon

- Suits Fuel Filter PL570
- · Weather resistant reinforced Nylon construction
- In addition fits other maker:
 Golenrod Models: 495 & 496

Baldwin Model: B10AL

National Spencer Model: NS-10

John Deere Models: TY15192 & TY15677 etc.

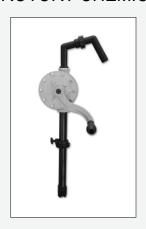

DISPENSING EQUIPMENT MANUAL CHEMICAL PUMPS

PL600 ROTORY CHEMICAL PUMP

Product Code Description PI 600 Rotary Chemical Pump		Flow Rate	Media
PL600	Rotary Chemical Pump	5 litres per 20 turns	Antifreeze, Fuel, Ad-Blue, Acid etc

- · Pump Body made from Glass filled Polypropylene with Ryton Vanes
- · All Seals are Viton & all pump hardware is Stainless Steel
- Threaded Polypropylene suction tube suits 50 to 205 Litre drums
- · 2 x bung adaptors included
- · Strainer fitted to the suction tube stop contaminants from entering the pump
- · Delivers: 5 litres per 20 turns
- Recommended use: Dispensing water based media, Anitifreeze, Urea, AdBlue, DEF, Benzine
- · Also: Detergents, Glycerine, Acids, Chemicals, etc.
- · In addition: to use with all Light weight petroleum based products
- DO NOT use with Acetone, Lacquer, Mineral oils, Solvents, Turpentine, etc.

PL601 LEVER ACTION CHEMICAL PUMP

Product Code	Description	Flow Rate	Media
PL601	Lever Chemical Pump	500ml per stroke	Antifreeze, Fuel, Ad-Blue, Acid etc

- · Lever Action Chemical Pump
- Wetted Components: Polyacetal, Polypropylene, PVC & Viton
- Anti siphon vent cap when loosend breaks the siphon action
- · Built in 2" Bung Adaptor
- Flow: 500 ml per Stroke
- Suction tube suits 50 to 205 Litre drums
- Pump outlet fitted 2 M x 3/4" flexible corrugated discharge hose
- Design makes it extremely comfortable to pump thick oils without excessive fatique
 Perommended use: Water based media. Determents, Soans, Antifrogra, windshield
 Perommended use: Water based media. Determents.
- Recommended use: Water based media, Detergents, Soaps, Antifreeze, windshield washer fluid
- · Also: Hydraulic oils, Lubricants, Herbicides & Pesticides, Ad-Blu, Urea, DEF
- · Pump should ONLY be used with NON flammable liquids

PL610 MANUAL HEAVY DUTY SIPHON PUMP

Product Code	Description	Flow Rate	Media
PL610	Siphon Pump	21 litres per minute	Antifreeze, Fuel, Ad-Blue, Acid etc

- · Up/Down lever action
- Easy to use Polyethylene Pump, siphon liquids to lower levels than the height of pump
- Easy to prime and start within 6 to 7 strokes
- · Suits 205 litre drums, suction tube length 1212 mm
- Flow: 21 LPM
- · Flexible corrugated discharge hose length 1200 mm
- Recommended use: Water based fluids, Detergents, Waxes, Soaps, Antifreeze, mild acid
- · Also Detergents, Glycerine, Acids, Chemicals, etc.
- In addition: to use with all Light weight petroleum based products
- · Do NOT use with Acetone, Lacquer, Mineral oils, Solvents, Turpentine, etc.
- Pump should only be used with light weight & NON Flammable media
- DO NOT use with any media not compatible with materials used in the pump contruction
- <u>WARNING</u>: Pumps must never be used with HOT media at temperatures above +60°C

This page is part of a complete catalogue containing technical and safety data.

All data must be reviewed when selecting a product.

DISPENSING EQUIPMENT DRUM ACCESSORIES

PL670 DRUM WRENCH

Product Code	Description	Material	Bung Sizes
PL670	Drum Wrench	Cast Aluminium	2" and 3/4"

- · An easy & convenient tool to open almost all types of drums
- Wrench is manufactured from cast aluminium (LM25) hardened & tempered to increase strength
- Ends of Wrench are designed to fit perfectly into most 2" & 3/4" drum plugs

PL671 DRUM FAWCET / TAP

Product Code	Description	Material	Thread Size
PL671	Drum Faucet / Tap	High Density Polyethylene	3/4" BSP

- · Body: High density Polyethylene. Knob: Low density Polyethylene
- Fits into 3/4" threaded opening on 205 litre drums
- · Facilitates convenient dispensing of media under gravity flow with the drum laid horizontally

PL672 ALUMINIUM DRIP PAN

Product Code	Description	Material	Thread Size		
PL672	Aluminium Drip Pan	Cast Aluminium	2" BSP		
Hand and district format action in the control of the district of the control of					

- · Used as a drain for returning over flown media during dispensing
- Fits into any 2" threaded opening on a drum barrel or tank
- · It additionally works as a base for holding a container during dispensing
- Keeps workplace clean & eliminates wastage, saving money each time the pump is used
- Designed with built in 2" bung adaptor & strainer for draining clean media back into the drum

PL673 DRUM BUNG CONVERTER

Product Code	Description	Material	Thread Size
PL673	Drum Bung Convertor	Polypropylene Co-Polymer	2" Fine x 2" Coarse

- Converts 2" Fine threads found on most pumps / drum bungs to 2" male coarse
- · Making the pumps good for use on Plastic drums with 2" coarse female threads
- · Construction: Polypropylene co-polymer designed with 4 protrusions for easy tightening
- Dimensions: 82 mm diameter x 34 mm high

AIR EQUIPMENT AIR LINE EQUIPMENT & GUNS

PL710, PL721 & PL725

MINIATURE 1/4" FILTER REGULATOR LUBRICATOR (2 PIECE)

Product Code	Description	Description	Sizes	
PL710 Miniture 1/4" FLR		Die Cast Aluminium / Polycarbonate	1/4"	
PL721	FRL Miniture Piping Adaptors	Used to connect PL710 FRL Units	1/4"	
PL725	Spare Filter Element	Suit PL710 Filter	5 Micron	

- Miniature 1/4" Filter Regulator Lubricator (2 piece)
- Die cast Aluminium Construction c/w Polycarbonate bowl with steel bowl guard
- Pressure Gauge & Mounting Bracket included
- Ports: 1/4" Bsp
- Flow: 500 Lpm (18 cfm)
- · Maximum Pressure: 10 Bar (145 Psi)
- Pressure Adjustment Range of 0.5 10 Bar. (7 145 Psi)
- · Filter Element: 40 Micron
- · Press type manual drain with "night time drain"

PL730 & PL731

AIR BLOW GUNS WITH STAINLESS STEEL NOZZLES

Product Code	Description	Materials	Inlet Port	
PL730 Air Blow Gun with 114 mm Nozzle		Body: Nylon Nozzle & Parts: S/Steel	1/4" BSP Fem.	
PL731	Air Blow Gun with 330 mm Nozzle	Body: Nylon Nozzle & Parts: S/Steel	1/4" BSP Fem.	

- Air Blow Gun with 114 mm & 330 mm nozzles
- · Impact & weather resistant Nylon Body
- Stainless Steel Nozzle & parts
- · Drop resistant construction
- Handle with Soft rubber grip for convenience & continuous use
- Ergonomic design of the gun helps eliminate the risk of Carpel Tunnel
 Connection: Brass threaded 1/4" BSP (F)
- Operating Pressure: 3.5 16 BAR (50 -235 Psi)
- Blowing Force at 6.8 bar = 0.35 Kgs
- Air Consumption: 15.18 CFM & 15.26 CFM @ 6.8 Bar respectiely
- Noise Level: 80 db @ 100 Psi

PL735 AIR BLOW GUN POLYACETAL BODY

Product Description		Material	Thread Size
PL735	Air Blow Gun	Body: Polyacetal, Nozzle: Aluminium	1/4" BSP Fem.

- Polyacetal Body (POM)
- Non corroding Aluminium nozzle
- · Variable Speed trigger ensures for full control of amount of air dispensed
- · Connection : Brass threaded 1/4" BSP (F)
- Operating Pressure : 3.5 10 BAR (50 150 Psi)
- Blowing Force @ 6.8 Bar = 0.472 Kgs
- · Air Comsumption: 19.06 CFM @ 6.8 Bar

AIR EQUIPMENT & GUNS

PL739

AIR BLOW GUN KIT C/W 6 INTERCHANGEABLE ACCESSORIES

Product Code	Description	Material	Thread Size
PL739	Air Blow Gun Kit	Body: Nylon, Accessories: Aluminium & Rubber	1/4" BSP Fem.

Includes:

- · Air Blow Gun PL730
- · 100mm Protective Shield
- · Soft Rubber Star Tip Nozzle for use on delicate materials
- 12.7 mm Rubber Tip for blowing out lines & cavities
- 25 mm Rubber Tip for blowing out lines & cavities
- 35 mm Rubber Tip for blowing out lines & cavities
- Venturi Nozzle turbo charges output. Great for blowing out dust, dying off and washing parts fast

PL740 AIR BLOW GUN

Product Code	Description	Materials	Thread Size
PL740	Air Blow Gun	Body: Die Cast Aluminium, Nozzle: Rubber	1/4" BSP Fem.

- · Metal Lever Air Blow Gun
- · Manufactured from Die Cast Aluminium
- Feature revolutionary Venturi Mechanism that uses side ports to combine free ambient air with costly compressed air, creating a much higher volume of usable output
- Ergonomic design of the body & large dip coated lever reduces user fatigue & discomfort, even during extended use
- · Maximum Pressure: 10 Bar (150 Psi)
- Threaded 1/4" (F) at inlet & 1/8" (F) at outlet
- 1/2" Rubber Tip
- Maximum DBA: 85

PL749 BLOW GUNS & ACCESSORIES KIT

Product Code	Description	Materials	Thread Size
PL749	Air Blow Guns & Accessories Kit	Various	1/4" BSP Fem.

- · Lever air blow gun kit with interchangable tips
- · Accessories supplied in tough plastic case and includes:-
- * 2 x PL740 Metal blow guns
- * 1/2" Rubber tip
- * Standard tip
- * Standard safety tip
- * High flow safety tip
- * Safety booster tip
- * Safety tamperproof tip
- * 1" Rubber tip
- * 1.3/8" Rubber tip
- * Soft rubber star tip

- * Adjustable brass tip
- * Nylon screen 1.1/4" wide tip
- * Nozzle with 4" protective shield tip
- * Nylon tapered tube 3" long tip
- * Mini aluminium tip
- * S/S needle 1.3/4" long x 1.8mm dia. tip
- * S/S needle 2.15/32" long x 2.4mm dia. Tip
- * Steel wire brush tip for industrial cleaning & drying
- * Extended reach Aluminium tube 3" long tip
- * Extended reach Aluminium tube 6" long tip

LUBE EQUIPMENT POWERED PUMPS

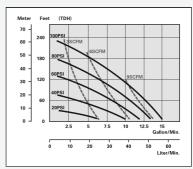

ALNDP-15FPH AIR OPERATED DIAPHRAGM PUMP POLYPROPYLENE BODY

Product Code	Description	Pump Capacity
ALNDP-15FPH	1 1/2" Poly Diaphragm Pump	45 litres / minute

- · Air operated double diaphragm pumps for use in a wide variety of industries
- · A reliable, cost effective and versatile means of transferring fluids
- Suitable for the transfer of a wide variety of fluids including engine oil, gear oil, waste oil, some chemicals, caustic, antifreeze and waste water
- · Polypropylene body with easily replaced Hytrel diaphragms
- · All bolted construction enables easy servicing

Air Motor: Ryton®
Port Dimensions: 1/2" BSPT Female
Max. Liquid Temperature: 120°C
Air Inlet (includes ball valve): 1/4" NPT (F)
Air Exhaust: 3/8" NPT Female
Air Supply: 20 - 100 psi (1.4 - 7 Kg/cm²)
Discharge: 128 ml per cycle
Max. Cycle Rate: 400 Cycles per minute
Max. Size Solid: 1 mm
Max. Dry Lift (Suction): 2.4 m
Weight: 3.5 Kgs

Performance Graph based on 305 mm flooded suction, with water at ambient temperature

ALNDP- xxBAH AIR OPERATED DIAPHRAGM PUMP ALUMINIUM BODY

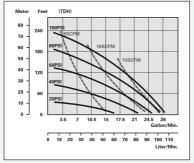

Product Code	Description	Pump Capacity
ALNDP-20BAH	Aluminium Diaphragm Pump 3/4" NPT	100 litres / min maximum
ALNDP-25BAH Aluminium Diaphragm Pump 1" NP		180 litres / min maximum

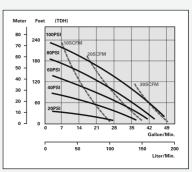

Air Motor: Aluminium
Port Dimensions: 3/4" NPT Female
Max. Liquid Temperature: 120°C
Air Inlet: 1/4" NPT Female
Air Exhaust: 3/4" NPT Female
Air Supply: 20 - 100 psi (1.4 - 7 Kg/cm²)
Discharge: 615 ml per cycle
Max. Cycle Rate: 195 Cycles per minute
Max. Size Solid: 2 mm

LUBE EQUIPMENT

ACCESSORIES

AL20022 LED CORDLESS WORKSHOP LIGHT

Product Code	Description	Features
AL20022	LED Cordless Workshop Light	Inspection Light / Torch combined

- 30 LEDs on the side of the light for general ambient lighting
- · 6 LEDs at the top for torch beam lighting
- The LED elements have a rated life of 100,000 hours
- · Shatterproof construction
- · Supplied inclusive of a 240 volt recharger and a 12 volt recharger
- Docking station
- · Magnetic centre piece that enables hands free illumination of an area
- Maximum active life of the light as a secondary larger source after full recharge is approximately 10 hours
- A full charge for 6-8 hours must be completed prior to the initial use of the light to ensure correct operation

DISPENSING EQUIPMENT HOSE REELS

Description:

- The Pirtek hose reel range makes light work of hose storage and retrieval. The range of hose reels facilitates the easy retrieval and storage of small or large, single or dual, short or long assemblies
- A versatile range suitable for a wide range of applications from water to fuel, lubricant, oxceyletene, breathable air and other fluids transfer
- The price to quality ratio is arguably the best available in Australia
- CAD designs and stringent quality control guarantee first class quality at all times

Product Range:

- · Spring rewind hose reels
- · Air rewind hose reels
- Hydraulic rewind hose reels
- · 12 volt and 24 volt rewind hose reels
- · Manual rewind hose reels
- Suitable for hose assemblies from 6mm ID up to 32mm ID
- Suitable for hose assemblies from 6 metres long up to 225 metres long

Applications:

- Primary Industry applications include timber processing, fisheries, agricultural, mining
- Secondary Industry applications include aviation, industrial, fibre packaging plants, printing plants, tyre plants, bakeries, automotive workshops, service station forecourts, contractors, steel mills, manufacturing, aluminium smelters, service trucks, golf courses etc.

DISPENSING EQUIPMENT

INDUSTRIAL HOSE REELS

AL501xxx OPEN TYPE BARE HOSE REELS AIR / OIL / GREASE

Product Code	Intended Use	BSP Threads	Recommended Hose
AL501198	Air / Low Pressure Water	1/2" In, 1/4" Out	13 m Textile 3/8" 15 bar
AL501298	Oil	1/2" In, 1/2" Out	10 m 1 wire 1/2" 75 bar
AL501398	Grease	1/2" In, 1/4" Out	10 m 2 wire 1/4" 350 bar

- · Double arm automatic rewind hose reels for air, water, oil or grease
- All metal construction with forged brass shaft for corrosion free and leak proof operation even at high pressure
- Hose recoiling is driven by a special steel spring, which provides a long life and trouble free operation
- · Positionable arms for optimum operation in any mounting position: wall, ceiling, floor or tank
- · Maximum hose capacity: See Table above

AL504xxx OPEN TYPE BARE HOSE REELS AIR / OIL / GREASE

Product Code	Intended Use	BSP Threads	Recommended Hose
AL504199	Air / Low Pressure Water	1/2" In, 1/2" Out	15 m Textile 1/2" 15 bar
AL504299	Oil	1/2" In, 1/2" Out	15 m 1 wire 1/2" 75 bar
AL504399	Grease	1/2" In, 1/4" Out	15 m 2 wire 1/4" 350 bar

- Dual pedestal
- Heavy duty double arm automatic rewind hose reels for air, water, oil or grease.
- All metal reinforced construction with forged brass shaft for corrosion free and leak proof operation even at high pressure.
- Hose recoiling is driven by a special steel spring, which provides a long life and trouble free operation.
- Positionable arms for an optimum operation in any mounting position: wall, ceiling, floor or tank.
- Maximum hose capacity: 15 m x 1/2" hose

AL505xxx 3/4" HOSE CAPACITY AIR, WATER, OR FUEL HOSE REEL

Product Code	Intended Use	BSP Threads	Supplied Hose
AL505000	Air / Low Pressure Water / Oil	3/4" In, 3/4" Out	Bare Reel
AL505201	Air / Low Pressure Water / Fuel	3/4" In, 3/4" Out	15 m 1 wire 3/4" 75 bar
AL505299	Bare Hose Reel		Bare Reel

- Dual Pedestal
- Double arm, high volume, automatic rewind hose reels for air, water, or oil.
- · All metal reinforced
- Full 3/4" port shaft and swivel so no flow restrictions.
- Hose recoiling is driven by a special steel spring, which provides a long life and trouble free
 operation.
- Positionable arms for an optimum operation in any mounting position: wall, ceiling, floor or tank.
- Maximum hose capacity: 20 m x 1/2" hose or 15 m x 3/4" hose.
- Models with hose include a 0.6 m long inlet hose.

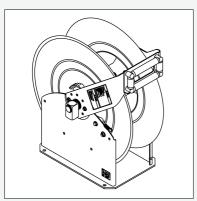

DISPENSING EQUIPMENT

INDUSTRIAL HOSE REELS

AL7342 SELF RETRACTING REEL 1" BARE HIGH CAPACITY

ALOS615 OXY ACETYLENE HOSE HOSE REEL

Product Code	Description	Max. Pressure	1" Hose Capacity
AL7342	Self Retracting Reel 1" Bare	69 bar	15 m 1 wire or fuel hose

- High-capacity hose reel designed to deliver fuel (such as diesel fuel, aircraft fuel, and gasoline) and lubricating oils while mounted to a lubrication truck or to a ceiling* or wall)
- The reel mounts as a single unit or in banks of as many as required
- The hose guide arms can attach to the base assembly in five (5) different positions
- Connections: Inlet 1" NPTF Female Outlet 1" NPSM Female (or 3/4" NPTF Female via supplied bushing)
- · The reel is spring-powered and self-retracting
- When the hose is extended, the reel can be latched on either of two ratchet sections per turn of the sheave.
- · A pull releases the latch from the ratchet and allows the hose to retract onto the reel
- If used to deliver gasoline or aircraft fuel, static electricity must be prevented:
 1.delivery and connecting hose must contain a grounding wire
 2.entire fuel delivery system must be properly grounded
- Failure to do so can result in personal injury through fire and/or explosion
- * Maximum height of the base plate above the floor 4.9 metres to comply with warranty

Product Code	Intended Use	Hose Capacity
ALOS615	OXY ACETYLENE HOSE REEL	15 metres

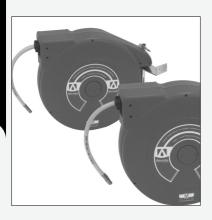

- · Heavy duty steel construction with corrosion resistant powder coat finish
- · Double 'O' Ring design prevents leakages
- 300 psi maximum working pressure
- Includes 15 metres of 1/4" ID delivery hose and 1.5 metres of lead-in hose
- · Suited to use on light commercial vehicles

DISPENSING EQUIPMENT

COMPACT HOSE REELS

ALAP650 / ALAP840 ROLLA AIR REELS

Product Code	Description	Supplied Hose
ALAP650	Air Reel	15m x 10mm hose with 3/8" BSP M&F
ALAP840	Air Reel	13m x 12mm hose with 1/2" BSP M&F

- Used extensively in locations including service station forecourts, automotive mechanical workshops, assembly plants, processing plants and food processing facilities
- · Supplied inclusive of supply and lead-in hoses
- Two way roller guides extend hose life and ensure even hose retrieval and storage
- · Detachable but sturdy steel mounting brackets facilitate quick and easy hose reel mounting
- Can be floor, wall or ceiling mounted
- · Automatic and positive latching mechanism locks the hose assembly at the desired length

ALAP809 / ALAS812 COMPACT ROLLA AIR REELS

Product Code	Description	Dimensions (mm)
ALAP809	Air Reel	9m of 5/16" ID hose
ALAS812	Air Reel	12m of 3/8"ID hose

- · Ideal solution where space is limited
- · Constant tension or automatic stop option
- · Fully serviceable spring cassette
- · Moulded steel electrostatically painted cover
- · Reinforced polyurethane hose
- · 4-way roller guide assembly
- · Swivel mounting bracket
- Heavy duty inlet swivel rated to 20 bar
- Includes delivery hose and inlet hose
- 12 month warranty

ALWP808 / ALWS812 COMPACT ROLLA WATER REELS

Product Code	Description	Dimensions (mm)
ALAP809	Water Reel	9m of 5/16" ID hose
ALAS812	Water Reel	12m of 3/8"ID hose

- · Ideal solution where space is limited
- · Constant tension or automatic stop option
- · Fully serviceable spring cassette
- · Moulded steel electrostatically painted cover
- · Reinforced polyurethane hose
- · 4-way roller guide assembly
- Swivel mounting bracket
- · Heavy duty inlet swivel rated to 20 bar
- · Includes delivery hose and inlet hose
- 12 month warranty

LANOLIN PROTECT LANOLIN LUBRICANT & PROTECTANT

Aerosols:

Product code: PIR300C

- Lanolin / hydrocarbon solvents blend
- Appearance: yellowish/tan coloured liquid with a slight characteristic wool odour.
- Boiling point melting point: 195°C
- Vapour pressure: 0.06 Kpa @ 38°C
- Specific gravity: 0.85 0.88
- Flash point: 78°C (solvent content)
- Flammability limits: 0.6 7.0 L.E.L. U.E.L.
- Solubility in water: partial, turns to white emulsion.
- Autoignition temperature: >200°C
- · Water resistant, water dispersant
- Anti corrosive spray
- Suits all ferrous and non ferrous materials such as steel, iron, stainless steel, copper, timber, leather, vinyl, canvas, plastics etc.
- · Not for use on high speed bearings
- Safe to use on electrical equipment to 70000 Volts (DO NOT apply to live electrical equipment)

Sprayable Liquids:

Product Codes:

PIR1L, PIR5L, PIR20L, PIR750ML

- Properties as for the aerosol form, but with higher lanolin content
- Use in harsh environments or where surfaces require a thicker film for more robust long term protection is required

ALL LANOLIN PRODUCTS
ARE NON TOXIC AND
ENVIRONMENTALLY
FRIENDLY

Refer Pirtek for MSDS sheets for these Products

Greases (anhydrous lanolin):

- Product codes: PIRG165mL, PIRG1L, PIRG4L
- Appearance: yellowish, tenacious, semisolid fatty substance with a slight characteristic odour
- Boiling Point Melting Point: 175°C (decomposition)
- Vapour pressure: not available
- Specific Gravity: 0.89 0.95
- Flash Point: 232 238°C (complies with Flash Point Determination in accordance with AS 2106.2:1999 using the Pensky-Martens apparatus conducted by Department of Mineral Resources, Mine Safety Laboratory)
- · Flammability Limits: Not available
- · Solubility in Water: Immiscible
- Ideal as a water resistant, anti-corrosive underwater and general purpose grease
- · Nut and thread anti-sieze
- Protects metal, timber, rubber, vinyl, plastics
- Safe to use on electrical equipment to 70000 Volts (DO NOT apply to live electrical equipment)

LANOLIN PROTECT POINTS TO NOTE

SAFETY

- Liquid lanolin products contain specifically blended solvents that require a short time to evaporate. It is essential that the products are not applied to electrical equipment while it is live
- Lanolin products are derived from natural wax (wool grease) and are biodegradable, non toxic, and provide a safe, superior alternative to traditional petrochemical based dewatering and lubricating fluids
- Lanolin products provide high load bearing capabilities on bearings, but are not suited to use in high speed bearings
- Do not spray liquid lanolin products near fire, flame or sparks
- Lanolin products will not wash off. If surfaces coated with lanolin are to be painted, clean surfaces with white spirits, or steam clean above 65°C

EMULSION COMPATIBILITY AND LIMITATIONS (UNDERGROUND MINING)

Pirtek Protect Lanolin lubricant and anti-seize greases offer long term protection, even in the harshest conditions. They protect, lubricate, penetrate and displace.

In the harsh environment that is underground mining using longwall equipment, machinery in the longwall is subject to mine waters and emulsions. It is important to lubricate moving parts and O-rings in the machinery to ensure that the equipment is kept running smoothly and to prolong the life of the machinery.

Pirtek Protect lanolin lubricant and anti-seize grease do just that!

Independent tests have been performed for both the lanolin lubricant and the anti-seize grease. Both products were each added with longwall emulsions at a set concentrate, based on the upper limit that might be reached in field application. Both products passed an O-ring swell test and thermal stability test.

- The O-ring swell test consisted of an O-ring immersed in the lanolin lubricant mixed with a longwall emulsion, and an O-ring immersed in the anti-seize grease mixed with a long wall emulsion. The O-rings were left in the mix for 56 days at 70°C. At the end of the test date, both O-rings were found to have no significant difference in swell.
- The thermal stability test was performed on both the Protect Lanolin lubricant and antiseize grease, to test the oil separation when these products were added to the longwall emulsion.
- The stability tests were conducted for 168 hours at 70°C. At the end of the test period, there was no oil separation in either product.
- Excessive application of Lanolin grease to fittings and threads in a hydraulic system has been reported to cause precipitation of the grease in low-flow areas such as pilot systems.
 This can lead to a collection of microscopic debris that may cause problems with valve operation

As a result of the this last point, the Protect lanolin product should not be allowed to come in contact with longwall emulsion hydraulic fluid. Its use should be restricted to lubrication of mechanical and electrical components external to the emulsion

FLASH POINT

Flash Point Approval has been granted to the range of Lanolin Products in accordance with Australian Standards AS2106.2:1999, using the Pensky-Martens apparatus.

Flash Point approval testing of the Lanolin Products was conducted and the approval has been granted by the Department of Mineral Resources Mine Safety Laboratory of New South Wales to Australian Standards AS2106.2:1999 in a controlled laboratory environment. The Department of Mineral Resources has also assessed the Material Safety Data Sheets (MSDS) Industrial Grade, approval has also been granted as all MSDS are compiled to the criteria of Worksafe Australia guidelines.

Flash Point testing has been undertaken to ensure that its products are safe to use in the mining industry for both Open Cut and Underground operations.

LANOLIN PROTECT RECOMMENDED APPLICATIONS

OVERVIEW

Aerosols:

- · Electrical connectors
- Lubricant for drilling, cutting, machining and pressing
- · Welding anti spatter
- · Component preservation
- · Vehicle rust protection
- · Lubrication of light chains
- · Air tool lubrication
- · Locks and hinges
- Rejuvenates plastics, vinyls, aluminium & powder coating
- Reduce oxidation during shipping

Sprayable Liquids:

- · Harsh & corrosive environments
- Heavy chain & wire rope (non sling & non webbing)
- High speed and load bearing chains
- Battery terminals & connectors e.g. electrical fork trucks
- Assembly lube for rubber hoses & multi pin plugs
- Preservation & protect motors & bearings
- · Outside storage protection

Greases:

- · Food grade certified
- Non conductive to 70KV
- Rubber grease, non perishing, excellent belt grip
- · Welding nozzle dip
- Drilling & cutting aid
- · All purpose lubricant
- · Anti-seize for nuts & bolts
- Metal to metal soft seal gasket
- Stop galling of st. steel & alumin.
- Stops electrolysis of dissimilar metals

Release Agents:

- · Concrete form work
- · Water resistant
- · Self healing
- Stops swelling of timber end grain
- · Less cleanup after stripping
- · Extends formwork life
- · No damage to the environment

MINING

Pirtek Protect products are ideal in the mining environment because they provide what is effectively a hermetic seal or encapsulation of the targeted equipment. This protective film offers:

- · environmental friendliness
- · safety for workers
- · non-toxicity
- · superior dielectric performance
- · long term pro-active protection
- · Reduced acid etching
- · great lubrication and anti-seize properties
- · reduced hydrolysis
- · reduced dismantling time and improved safety
- · better opportunities for maintenance and therefore reduced downtime
- easy clean up

Use it on

- · Roof Bolters Drive chains, fittings, linkages and guides
- Rib Bolters Drive gears, fittings, linkages
- Miner- Drive chains, chassis and protective covers, linkages, fittings, actuator pins, mounting bolts, electrical equipment and connections
- Shuttle Car- Universals and drive chains, linkages, fittings, cable level wind system, chassis, electrical equipment and connections, haulage chains and flight bars, mounting bolts, actuator pins and sprockets
- Mobile boot end- Drive chains, track adjustment bolts, guides, fittings, linkages, hinges and electrical equipment, chassis and protective covers
- · Pumps and fan systems- linkages, protective covers, pump/fan housing, electrical equipment and fittings
- Conveyor Belts- Chains, shackles, turn buckles, electrical equipment, loop take up system, wire cables fittings, rollers, hanging brackets, pins, drive units, nuts/bolts, belt stands and rails

Long Wall Mining Operation

- · Chock Supports- Linkages and electrical equipment
- · Actuator pins, actuators, relay bars and guides
- Alternating Face Conveyor- Electrical equipment (motors etc), dog bone bolts, chain drives, sprockets, linkages, guides, threads (except hydraulic), main gate and tail gate drive units
- · Stage Loader and Crusher Unit- Linkages, electrical equipment, guides, threads (except hydraulic) and bolts
- · Pump Station- Pumps (except internal), electrical motors, filters, threads (except hydraulic) and bolts
- Conveyor Belts- Chains, shackles, turn buckles, loop take up system, electrical equipment, fittings (except hydraulic), wire cable, rollers, hanging brackets, pins, drive units, belt stands and rails

Washing or Screening Plant

- · Conveyor belts- Electrical equipment, chains, shackles, wire cables, loop take up system, fittings, hanging brackets, pins, belt stands and rails
- · Electrical Equipment- Motors, fittings, connections, lighting, camera surveillance systems, transformers, circuit breakers and distribution panels
- · Screening & washing system- Electrical equipment, drive units, chains, wire rope, pins, fittings, slides, nuts & bolts

LANOLIN PROTECT RECOMMENDED APPLICATIONS

METAL PRESERVATION

The metal preservation properties of Lanolin date back to ancient times. With modern refinement methods, Pirtek Protect offers you a product that can assist in so many ways. Machined, fabricated or ground components can be hermetically sealed against oxidization.

Benefits:

- · Hermetic component preservation
- · Remains pro-active
- · Resists acid etching
- · Great anti-seize properties
- · Non-toxic lanolin film
- · Easy clean up

Technical:

- · Remove all oxidation or existing scale (e.g. wire brush)
- · All surfaces must be dry and clean prior to coating
- · Due to its pro-active properties, Pirtek Protect's protective coating will remain operative until removed
- · A thin film of Pirtek Protect should be applied to all metal surfaces prior to storage. Lambswool pads may also be used to apply spray to components
- · Pirtek Protect Products will preserve all joints and fittings for ease of servicing
- · Clean off with steam cleaner or hot soapy water wash above 60°C

WELDING

Pirtek Protect can save you many hours of lost production time by taking away those annoying and costly problems of Spatter!!! Also helps preservation of weld seams and plating.

Benefits:

- · Reduction of embrittlement
- · Base metal protection
- · Component anti-spatter release agent
- · Anti-spatter agent for fabrication workbenches
- Spatter release agent for welding head
- · Reduces hydrolysis
- Easy to remove (Hot water wash above 60°C)

Technical:

Pirtek Protect is recommended for all welding situations

- · For MIG shields, dip the heated end of the hand-piece in Protect to prevent spatter adhesion. Repeat as necessary
- · All Pirtek Protect should be left for 30 seconds to allow the hydrocarbon solvent to evaporate prior to welding
- Pirtek Protect should only be applied while welds are still hot (but only if weld surface temperature is ≤ 195°C)
- · For best results the ideal application temperature is above 65°C
- Pirtek Protect can penetrate up to 10 microns in mild steel at approximately 65°C.

LANOLIN PROTECT RECOMMENDED APPLICATIONS

MARINE COATING

Benefits

Hull protection:

Pirtek Protect is not and has no anti-foul qualities, but will reduce water drag factors

An ideal marine coating because of its proven ability to resist acid etching, i.e. barnacles. Subsequent re-application requires no special hull treatment such as sanding/grinding etc. Slipway or hardstand time is reduced due to the saving in preparation and spray application time

Virtually eliminates electrolysis - a little spray will stop this expensive killer

Drastically reduces bacterial attachments, thereby saving our waterways from the toxic cocktails caused by some traditional anti-fouls

Resistant to acid etching

Base metal penetration

Pro-active ability

Reduces hydrolysis

Also good for:

Outboard legs Sail Drives Bow Thrusters

Stern Drives Log Spigots Intake Pick-up Grates

Propellors

Buoys

Preparation

All equipment which has been in sea water, should first be washed down with liquid chlorine (3:1).

All boat hulls must be washed down with liquid chlorine (3:1) to kill any microscopic spore.

Aluminium hulls: The surface must be CLEAN and DRY. If heavy oxidation exists, remove with aluminium cleaner, and then apply Pirtek Protect.

Previously anti-fouled hulls: Remove marine growth and loose anti-foul particles thoroughly. Surface must be CLEAN and DRY before application of

Propellors: Clean propellor or fitting back to base metal and wash with a liquid pool chlorine at 3:1 ratio to kill any microscopic spore. (very important)

Application

Pirtek Protect Coating can be applied by:

- (a) Sprays (including airless)
- (b) Roller or brush

Generally 1 or 2 coats are sufficient.

Always allow evaporation time between coats and before launching. Remember Protect always remains tacky until submerged

Propellors: It is preferable to heat the metal to between 65°C to 100°C. Liberally apply Pirtek Protect Grease directly onto the hot components and rub in where practical.

Re-application

Clean off with steam cleaner or hot pressure wash. Surface may be cleaned by using Surface Prep or by hand scrubbing with hot water above 60°C. When CLEAN and DRY, re-apply as per instructions

Maintenance

All moored hulls MUST be visually inspected, and the hull wiped down every 4–6 weeks if required.

LANOLIN PROTECT RECOMMENDED APPLICATIONS

AROUND THE HOME

Pirtek Protect products are ideal in the mining environment because they provide what is effectively a hermetic seal or encapsulation of the targeted equipment. This protective film offers:

- Stop squeaks from hinges on gates, doors and children's toys
- · Having trouble again with that key in a padlock or door one, quick squirt protects and lubricates for long periods
- · Lubricate sliding doors to restore smooth action
- · Oil the bike chain and coat the bike preventing rust, Pirtek Protect works as well as a polish without the elbow grease
- · Rejuvenate those dried out seals on pool pumps and filters
- · Lubricate tracks for garage doors ensuring trouble free operation
- · Protect your valuable tools from rust and corrosion
- · Release those rusted up nuts and bolts in seconds

Antennas / aerials

Due to the composition of dissimilar metals and high thermal cycling rates, antennas / aerials can benefit greatly from an application of Pirtek Protect, especially in severe corrosive environments.

Benefits

Penetrates joints

Penetrates base metals

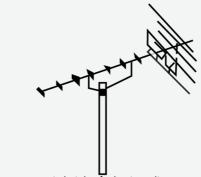

Reduces electrolysis

No seizing of fittings

The oxidization process is retarded

Technical

- · Remove all flaking and oxidation with a wire brush.
- · Apply Pirtek Protect to the antenna installation.
- Before application all components must be dry and should be carried out on a warm to hot day for best results.
- · Pirtek Protect can be used as an anti-seize during installation on all bolts and nuts to protect and extend the life of your antenna.
- Non-conductive to 70KV but will not impede electrical contacts

INDUSTRIAL ASSEMBLY PRODUCTS REFER PIRTEK FOR MSDS SHEETS

IAT77-50 IAT77-10 PRIEK T77 A Printer A Printer Transport T

Threadlockers:

Product Codes:

IAT43 in 10 ml and 50 ml bottles

Medium Strength Blue IAT43 Nut Lock

Description

Protect IAT43 is an anaerobic formulation designed to be used on parts in an "As Received" condition, such as those with protective films (oils) etc.

Applications

Designed for direct application onto as received parts where a light oily film exists or where surrounding parts contamination is a problem in maintenance

Useful Hint

Where possible, remove thick deposits of grease or dirt, however IAT43 will penetrate the film once it has been tightened

Properties

Use as a conventional medium strength Locker on cleaned parts with strengths up to 12N/mm² or as a convenient all purpose locker on oily parts with 8-10/mm² typical strength depending on oil type and film

Procedure for Application

Product is normally hand applied from the bottle. Full cure time 24 hours

Compatible Accelerators / Primers

Not recommended

Technical Features

recrimical realures	
Resin	Mod Methacrylate
Colour	Blue Thixotropic
Cure Speed	<15 mins @ 20°C
Viscosity	2500-5000
Thixotropic Gap Fill	0.1mm
Flash Point	
Life	12 months @ 20°C
Specific Gravity	1.04
Max. Operating Temp	53°C to + 150°C

Threadlockers:

Product Codes:

IAT77 in 10 ml and 50 ml bottles

High Strength Red IAT77 Stud Lock

Description

IAT77 is an anaerobic locking compound in the form of a viscous paste and it is used to give high strength locking action

Applications

Mostly for fasteners of 25 mm (1" size) and above. Examples include

- · Studs on Pressure Vessels
- · Studs on Locomotive Units
- · Hydraulic Studs on Presses
- · Rock Crusher Studs
- · Crawler Track Studs

Useful Hin

To speed cure or to help cure in cold conditions, use IA471 Activator on parts

Properties

High Torque: 23.7 N-m (210 ins. lbs)
Breakloose / Prevailing Torque: 34 N-m on rotation through 180 degrees

Procedure for Application

Product is normally hand applied from the bottle. Ensure parts are clean, dry and free from oil and grease

Compatible Accelerators / Primers

IAA471 Activator can be used, but up to 30% strength reduction may be incurred

Technical Features

recrimical realures
Resin: Dimethacrylate
Colour: Red
Fixture Speed with Activator: <10 mins/6 hours
Cure Speed without Activator: .1 hour/24 hours
Viscosity: 6500 cps
Gap Fill: 0.010"
Flash Point:
Shelf Life:
Specific Gravity:
Max. Operating Temp50°C to +150°C

Surface Preparation:

Product Code:

IAA471-200 in 200 ml Aerosol

Structural Activator for Anaerobics

Description

IAA471 Aerosol assists in speeding up the cure time of all anaerobic fluids and pastes and extends the cure through volume (especially suited to Pirtek Protect IAT43 and IAT77 threadlockers).

Applications

Use IAA471 when materials are inactive (plastics or passivated metals) or where temperature is under 15°C.

Physical Properties

Standard Grade Solvent:	Heptane Based
Evaporation:	$\dots \dots60 \ seconds$
Flammability:	Flammable
Technical Features	

Odour	. Characteristic Odour
Viscosity	Non-Viscous
Flash Point:	17°C
Boiling Point	56-57°C
Flash Point	17 °C
Solubility in Water	Slightly Soluble

Consult Pirtek for MSDS Sheets for all Industrial Assembly Products

INDUSTRIAL ASSEMBLY PRODUCTS REFER PIRTEK FOR MSDS SHEETS

Sealing & Gasketing:

Product Codes:

IAS69 in 50 ml bottle

High Strength Hydraulic Sealant - Brown

IAS69 Hydraulic Seal is an anaerobic liquid which cures to form a tough, high pressure seal on all types of threaded couplings used on low, medium and high pressure lines

Applications

IAS69 is used for all types of hydraulic connections, sealing against typical pressure line ratings. Use Hydraulic Seal to fit valves, threaded couplings, adaptors, quick disconnect parts, compression fittings and vibration proofing joints. Designed for direct application onto as received parts where a light oily film exists or where surrounding parts contamination is a problem in maintenance

For fast cure, clean parts and apply local heat to joints with a heat gun or soft flame

Properties

IAS69 is tolerant of a light oil film. Seals up to 400bar, 20mm fittings, and makes vibration proof joints

Procedure for Application

Product is normally hand applied from the bottle. Ensure parts are clean, dry and free from oil and grease. Full cure in 12 hours

Compatible Accelerators / Primers

IA471 Activator can be used, but up to 30% strength reduction may be incurred

Sealing & Gasketing:

Product Codes:

IAS72 in 50 ml tube

Low Pressure Pipe Seal - White

Description

IAS72 White Pipeseal is an instant low pressure sealant for fine and coarse threads up to 2" in diameter. S72 does not fully cure until some 60 hours after application, allowing re-alignment of elbows and joints

Replaces tapes and dopes, stops gas and fluid leaks on most metals and assists in lubricating during assembly. IAS72 will not shred or tear which would contaminate your system. Use IAS72 to seal against oils, gases, chemicals, water, steam etc.

Useful Hint

Wipe threads with clean shop cloth. Apply a continuous bead to 3rd or 4th thread depending on the thread length

Properties

Instantaneous low pressure seal. No locking action up to 48 hours. Easy break loose allowing re-alignment

Procedure for Application

Ensure parts are clean, dry and free from oil and grease. Degreasing directly assists results

Compatible Accelerators / Primers

Not recommended

Technical Features

Resin	Dimethacrylate
Colour	White Paste
Cure Speed w/ ActivatorN	ot Recommended
Cure Speed W/out Activator	rUp to 60 hours

Flash Point	>85°C
Shelf Life1	2 months @ 20°C
Specific Gravity	1.25
Max Operating Temp	-55°C to + 150°C

Sealing & Gasketing:

Product Code:

IAS55 in 50 ml tube

Designer Gasket - Purple Paste

Description

Flange Seal Type IAS55 is a purple, smooth, thick paste. Easily applied, it cures once confined between the parts to form in place a tough, flexible gasket. IAS55 gives an instant low pressure seal

IAS55 is used for fuel and water pumps, split crank cases on engines, gearbox covers, engine thermostats, air compressor end caps, engine timing cam covers onto blocks, pump couplings, fuel tanks on small implements, chainsaws, lawn mowers etc. Use IAS55 for dressing gaskets, spacers etc.

Useful Hints

Where gap size is large or where the surface is uneven, apply IA471 Activator to help the product cure through volume. IAS55 can be roller coated, screen printed, traced or pad applied.

Properties

Instant low pressure sealant. Forms any size or shape. Will not shrink or relax. IAS55 is flexible and will not crack

Procedure for Application

Product is normally hand applied from the tube. Ensure parts are clean, dry and free from oil and grease

Compatible Accelerators / Primers

IA471 Activator can be used, but up to 20% strength reduction may be incurred

Cured Performance Full Cure Time

Full Cure Time:12 hours
Tensile Strength:8 N/mm²
Static Shear Strength12.5 N/mm²
Technical Features

INDUSTRIAL ASSEMBLY PRODUCTS REFER PIRTEK FOR MSDS SHEETS

IAS57-50

Sealing & Gasketing:

Product Codes:

IAS77 in 50 ml tube

High Strength Gas Pipe Seal - Yellow

Description

Protect IAS77 is a high viscosity thixotropic gel paste which cures rapidly, sealing instantly to 10 bar through its anaerobic cure system in contact with metals in the absence of air (oxygen). When fully cured it resists pressure up to 350 bar. IAS77 is not suitable for oxygen systems. AGA Certificate 6900

Applications

Typical applications are in sealing of all types of threaded connections against water, oil, gases and most common materials conveyed by pipes

Useful Hint

When cure speed is extended due to low temperatures or inactive surfaces, activator can be used. Best results are found if IAS77 is applied to 2nd or 3rd threadform. Excess can be wiped away, any migration into lines will not solidify and can be flushed away during commissioning

Properties

Fast cure to fixture usually <15 mins. @ 20°C
Temperature range: -50°C to +150°C

Typical Strength: 5 N/mm² Sizes 6mm up to 75mm (coarse)

Increase of gap size or fit extends the cure time Procedure for Application

Product is normally hand applied from the bottle. Ensure parts are clean, dry and free from oil and grease. Full cure 6-12 hours

Compatible Accelerators / Primers

IA471 Activator can be used, but up to 30% strength reduction may be incurred

Technical Features

recrimed reduces	
Resin:	Dimethacrylate
Colour:	Yellow
Cure Speed with Activator	::<10 minutes
Cure Speed w/o Activator:	<15 mins @ 20°C
Viscosity:	>50,000 cps

IAS57 in 50 ml tube

PTFE Instant Pipe Sealant

Description

Protect IAS57 Instant Pipe Sealant is an easy to use anaerobic pipe sealant which sets fast to give an instant low pressure seal of 100 psi and a high pressure seal of 10000 psi when fully cured. This high strength product provides 100% sealing capability and does not shrink after curing, unlike more traditional solvent based pipe dopes.

Applications

IAS57 Instant Pipe Sealant with Teflon lubricates parts during assembly. The cure system allows for realignment of parts up to 24 hours from application. This product can be used on most hydraulic, pneumatic, oil, water and gas connections.

Useful Hint

Ensure parts are clean, dry and free from oil and grease.

Cured Performance

Full Cure Time:.....24 hours @ 20°C Shear Strength......10000 psi

Procedure for Application

Product is normally hand applied from the tube or brushed directly onto threaded parts. Primers such as IA471 (Standard Anaerobic Activator) can be used. However up to 20% strength loss can occur when using accelerators.

Technical Features

Resin	Dimethacrylate
Colour	White
Fixture Speed w/Acti	vator<10mins
Fixture Speed w/out	
	4 hour
Visco	300,000 - 400,000cps
Gap Fill	0254mm
Shelf Life	12 months @ 20°C

Retaining:

Product Code:

IAR41 in 10 ml and 50 ml bottles

Medium Strength Bearing Fit - Yellow

Description

Bearing Fit IAR41 is a single part anaerobic securing compound, designed for fitting cylindrical metal assemblies and cures when confined between the parts

Applications

Protect IAR41 will secure all types and sizes of bearings, shafts and cylindrical parts which will require disassembly in the future. IAR41 is of medium strength and is colour coded yellow for job identification

Useful Hint

To speed cure or to help cure in cold conditions, use IA471 Activator on parts *Properties*

Fast cure usually <15 mins. @ 20°C

Medium strength removable compound

Typical Strength: 12 N/mm²

Procedure for Application

Product is normally hand applied from the bottle. Ensure parts are clean, dry and free from oil and grease. Full cure 12 hours

Physical Properties

Standard Grade Solvent:Heptane Based
ResinMod. Dimethacrylate
ColourYellow
Cure Speed With Activator<5 minutes
Cure Speed Without Activator10-15minutes
Viscosity1500 cps

INDUSTRIAL ASSEMBLY PRODUCTS REFER PIRTEK FOR MSDS SHEETS

Retaining:

Product Codes:

IAR62 in 10 ml and 50 ml bottles

High Strength / High Temperature

Description

IAR62 Retainer is rated up to 232°C as the upper operational temperature and is designed for bonding/securing in a high strength manner, all types of cylindrically fitted parts

Applications

Protect IAR62 is used on all types of applications where temperatures exceed the design features of conventional Retainers, above 150°C. It develops high strength at elevated temperatures.

Useful Hint

Speed cure IAR62 by applying a localised heat with a heat gun or by placing parts in an oven @ 100°C for 30 minutes. Pre-heating of parts also accelerates the fixture and ultimate final cure

Properties

Good gap fill ability. Elevated upper temperature limits. Resistant to 3000 psi shear *Procedure for Application*

Product is normally hand applied from the bottle. Ensure parts are clean, dry and free from oil and grease. Full cure in 24 hours

Compatible Accelerators / Primers

IA471 Activator can be used, but up to 30% strength reduction may be incurred

Cured Performance

Typical Breakaway Strength:.....20 N/mm² Technical Features

Resin	Mod. Dimethacrylate
Colour	Green
Cure Speed With Activa	tor10 minutes

Flash Point	>85°C
Shelf Life	12 months @ 20 C
Specific Gravity	1.08
Max. Operating Temp	55°C to + 232°C

Instant Bonding:

Product Codes:

IACA41 in 25 ml bottle

Quick Bonding

Description

IACA41 is a hybrid quality Cyanoacrylate which is surface insensitive and bonds to a wide variety of materials including wood, paper, cardboard, leather, fabrics etc. Bond times vary according to the substrates but are generally faster than normal superglues

Applications

Typical applications include wood trim on furniture, balsa wood bonding for hobbyists, leather accessories on shoes, fabric bows on shoes and lampshade bonding.

Other features include versatile bonding or most elastomers, metals and plastics

Useful Hint

On elastomer bonding and some plastics, residues or release agents on surfaces should be removed by wiping with a solvent cleaner

Properties

Steel to Steel:	20	N/mm ²
Rubber to Rubber	10	N/mm ²
Plastic to Plastic	15	N/mm ²

Procedure for Application

Ensure parts are clean, dry and free from oil and grease. Apply sparingly to one side and hold parts until handling strength is achieved (typically less than 15 seconds)

Compatible Accelerators / Primers

Primers such as A021 or Double Strength A113 as accelerators for fillet cure for priming absorbent surfaces (available from Pirtek to order)

Technical Features

recrimedir editares	
Resin	Modified Ethyl
Colour	Clear
Cure Speed W/ Activator	Not Recommended
Cure Speed W/o Activator	<10 seconds
Viscosity	120cps
Gap Fill	0.1mm
Flash Point	>85°C
Shelf Life	.12 months @ 20°C
Specific Gravity	1.05
Operating Temp	60°C to + 80°C

Instant Bonding:

Product Code:

IACA60 in 25 ml bottle

High Strength Instant Adhesive

Description

IACA60, when compared to other low viscosity Cyanoacrylates, outperforms most products for cure speed, final cured strength and simply the wide range of difficult plastics and elastomers it can bond

Applications

For example, Nitrile, Neoprene and natural rubbers can be bonded in 1-2 seconds and all the bonds are stronger than the material itself. Plastics such as ABS, soft PVC, Polyacetal, EPT and EVA all bond in 1-2 seconds and the bonds are stronger than the material being bonded. Metals such as steel, aluminium, copper and brass all bond in under 5 seconds and the bond strengths are superior to other manufacturers low viscosity products

Useful Hints

Slower cures of up to 12 seconds are found on Polymethyl Methacrylate (PMMA), Bakelite, Polycarbonate and Viton rubber. Polyolefins can be treated with special preparations. Consult Pirtek re Product Data Sheet 25 when dealing with these difficult plastics

Properties

Speed: Plastics (most)<2 seconds
Rubbers (most)	<4 seconds
Metals	<5 seconds
Strength:	Plastics to substrate failure
	Rubbers to substrate failure
Metals >3	30 N/mm ² (Shear 15 N/mm ²)

Procedure for Application

For best results, degrease/abrade and make sure the surfaces are clean and free from dirt, dust and contamination such as mould release agents. Apply a thin film or drop to one surface only and bring parts together holding firmly for a few seconds until the parts achieve a handling strength. Remember one drop bonds about 25mm² and a 25 ml bottle has about 200 drops. 24 hours for full cure

Compatible Accelerators / Primers

Primers such as A021 or Double Strength A113 as accelerators for fillet cure for priming absorbent surfaces (available from Pirtek to order)

Technical Features

Resin	Modified Ethyl CA
Colour	Clear
Cure Speed With Activator	Instant
Cure Speed Without Activator	1-5 seconds
Viscosity	20cps
Gap Fill	0.1 mm
Flash Point	>85°C
Shelf Life	12 months @ 20°C
Specific Gravity	1.06
Max. Operating Temperature	-60°C to + 90°C

INDUSTRIAL ASSEMBLY PRODUCTS REFER PIRTEK FOR MSDS SHEETS

IATDS252

TDS198 EPOXY:

Product Codes:

IATDS198 in 180 mm x 20 mm Rod Aluminium Stick - Epoxy Putty

Description

A hand kneadable, speciality epoxy putty that mixes in one minute to provide fast, permanent repairs to most aluminium surfaces. When applying it to surfaces it is necessary to work the material forcefully into the surface and apply pressure until adhesion begins to take effect. Lower temperature causes longer cure time. The handy rod form has the curing agent encapsulated in the contrasting colour base material. It's putty-like consistency eliminates drips and runs, providing "no mess" application with no tools required to use. The mixed epoxy turns from a silvery colour to "Alloy" upon curing and will not yellow upon exposure to UV light. After final cure, Aluminium Stick may be drilled, sawed, tapped, filed, sanded and painted. It allows patching in areas where welding is impossible.

Applications

After proper mixing, Aluminium Stick moulds like clay and may be used to permanently patch dents, scratches, cuts, gouges and holes in items such as housings and all types of repairs to mouldings and injection type shapes. Aluminium Stick is ideal for making emergency repairs to reforming, rebuilding and patching anything made out of aluminium such as HVAC parts, refrigeration units, air conditioning units, machine parts, alu-roofing, flagpoles, shelving, platforms, walkways, campers, vehicles, canopies, gutters, truck bodies, wheels, manifolds, stripped threads, marine hardware and casings

Useful Hint

Mixing: Twist or cut off required amount. To mix, knead with fingers to a uniform colour. If mixing is difficult, warm the stick to room temperature or slightly above. Apply to the surface to be repaired (within 2 minutes of mixing). The mixed epoxy does not exhibit high bond strength at this point, but appears to be merely lying on the surface.

Force into any cracks or holes to be filled and strike off excess material, preferably with a tool wetted with clean water. Work the material forcefully into the surface and apply pressure until adhesion begins to take effect.

For a smooth appearance, hand rub with water or a damp cloth prior to hardening. Remove excess material before hardening begins. After 15-20 minutes the epoxy will harden like metal and start to form a tenacious bond. After just 45 minutes IATDS198 is completely cured and can be drilled, sawed, carved, sanded, stained or painted

Properties	
Onenine Tim	

Opening Time:	5 minutes
Max. Temp Resistance:	120°C (150°C intermittent
Initial Cure:	1 hour max.
Full Cure Time:	24 hours

TDS252 EPOXY:

Product Codes:

IATDS252 in 180 mm x 20 mm Rod Steel Stick - Epoxy Putty

Description

Steel Stick is a hand kneadable, non rusting, steel reinforced epoxy putty that mixes in one minute to provide fast, permanent repairs to items made of ferrous and aluminium metals. It comes in a handy rod form with the curing agent encapsulated in the contrasting colour base material. It's putty-like consistency eliminates drips and runs, providing "no mess" application with no tools required to use. Steel Stick is black in colour after use.

Applications

After proper mixing, Steel Stick moulds like clay and may be used in many industrial and home Maintenance applications, including repair of iron pipes, tanks, tools and equipment, repair blow holes, holding and placement of fixtures and signs, repairs to moulds, patterns and castings, making prototypes, threadlocking, repair cracked castings, repairs to down spouts and gutters, light fixture installations, repairs to duct-work, anchor bolts, as well as countless other uses. The unused portion of Steel Stick will remain stable for years if protected from direct contact with the air, in cool conditions.

Useful Hint

Mixing. Twist or cut off required amount. To mix, knead with fingers to a uniform colour. If mixing is difficult, warm Steel Stick to room temperature or slightly above. Apply to the surface to be repaired (within 2 minutes of mixing). The mixed epoxy does not exhibit high bond strength at this point, but appears to be merely lying on the surface. Force into any cracks or holes to be filled and strike off excess material, preferably with a tool wetted with clean water. When applying to a damp, wet or slowly leaking area, work the material forcefully into the surface and apply pressure until adhesion begins to take effect. For a smooth appearance of the cured compound, hand rub with water or a damp cloth prior to hardening. Remove excess material before hardening begins. After 15-20 minutes the epoxy will harden like metal and start to form a tenacious bond. After just 45 minutes Steel Stick is completely cured and can be drilled, sawed, carved, sanded stained or painted.

roperties

Opening Time:	.3.5 minutes
Max. Temperature Resistance:	120°C (150°C intermittent)
Initial Cure:	.1 hour max.
Full Cure Time:	.24 hours
Lap Shear Strength (Steel):	6.2 N/mm(2)
Shore D Hardness:	80
Compressive Strength:	84 N/mm(2) - 12,000 psi

Procedure for Application

Surface should be cleaned free of grease or dirt. Scuffing or sanding the surface prior to cleaning helps to ensure a good bond

Technical Features

Resin:	.Epoxide
Chemical Resistance: .Hydrocarbons, keto aqueous salt solutions and dilute acids and	ones, esters, halo-carbon bases
Electrical Resistance:	.30,000 mega Ohms

Non-Volatile Content:	100%
Shalf Life:	>6 months @ 25°C

REX5 EPOXY:

Product Code:

IAREX5 in 25 ml double syringe

Fast Set General Purpose - Clear

Description

IAREX5 is a two part component low odour epoxy with an open time of 60 minutes and sets hard but workable. It is a viscous material that is usually supplied in cartridge format and is designed to mix in a ratio of 1-1 by volume using static type mixing nozzles

Applications

IAREXS epoxy is an effective adhesive for wood, metals, ceramic, fibreglass and most plastics. Typical applications include repairs and renovation of metal castings, ceramic titles, vessels or ornaments, wooden, metal or plastic furniture, stone or concrete paving slabs or copings. It is particularly useful for securing household fittings to brick, plaster, wooden or plastic surfaces, laminating melamine surface sheet to wood or block board, modelling and test rig manufacture.

IAREX5 epoxy is not suitable for polythene, polypropylene or plasticised PVC. If in doubt, carry out a small trial with the adhesive before using on a large application.

Once the pack has been opened, the cap (which is contained within the plungers) should be removed and placed over the open ends of the syringe. The cap will fit in only one way to avoid contamination

Typical Performance

ADV60 allows an open time of approximately 60 minutes prior to setting and gives a handling time of 10 hours with full cure @ 20°C in about 72 hours

Useful Hint

Cut nozzles and extrude equal amounts and mix for about 30 seconds. Static mix nozzles should be firstly equalised and a little extruded out and discarded as waste to ensure correct balanced mixing. Apply to a prepared surface and press or clamp surfaces together supporting the joint if required.

Note the handling time as the product chosen is a slow set variety

Temperature vs Strength

Ultimate strength is achieved above 60°C. It drops significantly from 50° to a minimum @ 40° of less than 25% of full strength or less

Properties

CURED PROPERTIES
Static mix nozzle opentime 4 mins.
Volume 100g mix 3.5mins

Cure to Light Fixture 15 minutes Cure to moderate handling @ 50°C strength – 2 hours Full 24 hour cure – shear.......<18W/mm2

INDUSTRIAL ASSEMBLY PRODUCTS REFER PIRTEK FOR MSDS SHEETS

Silicone Sealant:

Product Codes:

IASIL in 300 ml Tube

High Temperature Silicon - Black

Description

IASIL RTV Silicone is a one part, easily applied, pastelike sealant that cures to form a high purity elastomer on exposure to atmospheric moisture. No primers or accelerators are needed. When cured, it resists most chemicals, high temperatures and exhibits excellent mechanical properties

Applications

All applications where a non-sag sealant of exceptional longevity is required to bond glass, metals, ceramics, wood stone etc. IASIL eliminates leakage, reduces noise, absorbs vibration, seals and bonds parts into a secure unit.

Useful Hint

Where surfaces require only a single sided bond, it is possible to treat the side not requiring adhesion with a release agent or simply apply petroleum jelly or oil. When cured torque up the parts to form a compressive seal

Cure rate is 3mm in 24 hours but is humidity and temperature dependant. The rate of cure can be accelerated by increasing the temperature (70°C max.) and increasing the humidity levels

Procedure for Application

Product is normally hand applied from the cartridge. Ensure parts are clean, dry and free from oil and grease. Full cure in 72 hours

Compatible Accelerators / Primers

Products are available to order for difficult surfaces. Please consult Pirtek

.....72 hours maximum

Aluminium Anti-Sieze Lubricants:

Product Codes:

IAAA in 200 ml Tube or 500ml Can Aluminium Anti-Sieze - High Temp. 871°C

IAAA Aluminium-Graphite Anti-Seize paste consists of uniform, fine flaked particles in a special blend of lubricants and oils. It is ideal for use on a on a wide range of industrial products to prevent seizing, galling and excessive wear.

Can be used on nuts, bolts screws, pipe threads, O-rings, shafts and hubs. Typical applications include conveyor systems, gear boxes, chains, cams, u-joints, sprockets and tracking.

Protects up to 980°C

Prevents seizing and galling of metals

Protects against harsh and corrosive environments

Note that IAAA is not a high speed load carrying lubricant and is not recommended for ball or roller bearings.

On Part Performance

Temperature:..... ..-53°C up to 871°C Water Resistance:.... Excellent Corrosivity:.....Very Low Protection Level:..... .. Salt Water, Chemicals Procedure for Application

Ensure parts are clean and dry, then simply apply by brush to provide instant protection.

Technical Features

Base	Highly Modified Synthetic Oil
Additives:	Copper, Graphite, Aluminium,
	Anti Corrosion Properties
Shelf Life:	1½ Years
Consistency:	Paste
Viscosity	120K - 175K
Lubricityk Factor	0.18
Coefficient of Friction	0.07 from 20°C - 760°C
Specific Gravity:	app 1.3
Flash Point:	>150°C
Texture:	Smooth Paste

Meets or exceeds the requirements of MIL-A-907E specification and conforms to GM -6108M

Consult Pirtek for MSDS Sheets for all Industrial Assembly Products

Nickel Anti-Sieze Lubricants:

Product Code:

IANA in 500 ml Tub

Nickel Anti-Sieze - High Temp. 1426°C

IANA Nickel-Graphite Anti-Seize paste is a high temperature resistant anti seize paste that lubricates during assembly, providing protection against seizing, galling and excessive wear even in the most adverse conditions.

Applications

Lube for threaded parts

Lube for valve seatings

Rust preventative on any assembly

Fork Lift chain guard and lube

Boiler hinges and door latches

Prevents seizure on aero jets, turbines etc.

Protects threads, gears, pulleys, chains, rollers, cables, hinges, pivots, sprockets, oven doors, exhaust manifold parts, flues, and assemblies etc.

Useful Hints

Nickel Anti-Seize prevents corrosion in adverse conditions such as high and low temperatures and extremes of surrounding conditions such as rain, water jets, salt spray, salt water immersion etc.

Because nickel is such a hard metal that can keep surfaces apart, IANA is particularly well suited to applications involving dissimilar metals

Torque / Tension Relationships

Pre-load is provided with lubricity reducing friction, controlling on torque variations, and assisting in achieving the desired tensile pre-load

Properties

Resists galvanic action

Eliminates galling on press fits

Eliminates pitting and electrolysis

Eliminates seizure and protects from rust

Automotive - on and off road.

Marine and on board equipment

All types of Industrial equipment

Procedure for Application

Ensure parts are clean and dry, then simply apply by brush to provide instant protection.

- · Designed to carry automotive fuel
- Temperature range from -30° C to +100° C
- · Dual spiral wrap reinforcement
- Conforms to SAE 30 R6
- · Safety factor of 5:1.
- Hose is not suitable for submersion in tank

P311T095	P311T095-R	9.5	3/8	3.6	16.7	12	40	210

- For use with modern automatic transmissions
- · Nitrile inner liner
- · Polyester reinforcement
- Neoprene cover resistant to oil, fuel and heat
- Temperature range from -40° C to +135° C
- Manufactured to SAE 30 R6 Specification

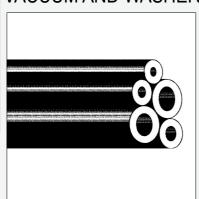

PACKAGED SPOOLS FOR WORKSHOP & HOME

P3300

AUTO

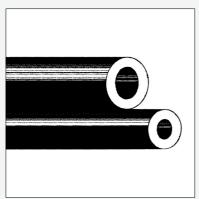

VACUUM AND WASHER HOSE

Produc	Product Code		Dimer	nsions			
		Inside Dia.		Wall	O.D.		
15 meter spool		mm	ins	mm	mm		
P3300025		2.5	7/64	2	6.5		
P3300030		3.0	1/8	2	7.0		
P3300040		4.0	5/32	2	8.0		
P3300045		4.5	11/64	2	8.5		
P3300055		5.5	7/32	2	10.0		
P3300063		6.3	1/4	2	10.5		

- · For use in windscreen washer systems and vacuum operated controls
- · Manufactured from EPDM rubber
- Withstands the pressure exerted by windscreen washer systems and control system vacuum
- · Heat and weather resistant
- · Manufactured to SAE-J-200 Specification

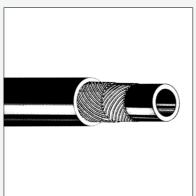

P3300 **AUTO** RADIATOR OVERFLOW HOSE

Produc	et Code		Dimer	nsions			
		Inside Dia.		Wall	O.D.		
15 meter spool		mm	ins	mm	mm		
P3300079		8	5/16	2	12		
P3300095		10	3/8	2	14		

- Suitable for radiator overflow and header tank applications
- · Manufactured from EPDM rubber
- · Withstand radiator temperatures and pressures as well as vacuum
- · Weather, oil and radiator additive resistant

P4205
AUTO
BRAKE VACUUM HOSE

Produc	ct Code		Dimer	nsions		Vacuum	Bend Radius	Weight	
		Inside Dia.		Wall	O.D.		Itaulus	1

P4205120	P4205120-R	12.5	15/32	4	20.0	0.87	40	299	

- · Designed to transmit manifold vacuum in automotive power assisted braking systems.
- · Neoprene liner and cover
- · Rayon reinforcement
- Conforms to SAE J 1403
- · Resistant to oil, petrol, heat and weather

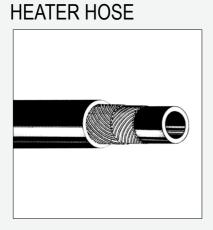

PACKAGED SPOOLS FOR WORKSHOP & HOME

P4801

AUTO

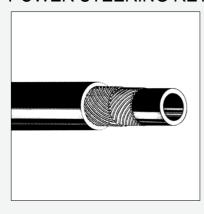

Product Code			Dimer	nsions		Working Pressure	Bend Radius	Weight
		Inside Dia.		Wall	O.D.

- * 25 meter roll length in this size
- · Developed for vehicle coolant systems
- Safety factor of 3:1
- Temperature range of -40° C to +100° C
- Made from a rubber and EPDM blend
- · Reinforced with a double braid spiral wrap
- · Conforms to SAE 20 R3
- · Weather resistant
- · Impervious to coolant system additives
- Not suitable for use with petrochemical products

P5130 AUTO

POWER STEERING RETURN HOSE

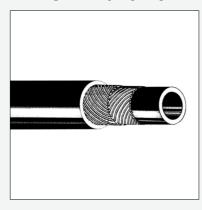

Produc	Product Code		Dimer	nsions		Working Pressure	Bend Radius	Weight	
		Insid	e Dia.	Wall O.D.		riessuie	Naulus	_

P5130100	P5130100-R	10	3/8	4.0	18.0	16	40.0	242	

- Designed specifically as low pressure side return hose for vehicle power steering systems
- Nitrile inner liner
- · Polyester double braid reinforcement
- Neoprene cover
- · Resistant to oil, fuel and heat
- Operating temperature range is -40° C to +121° C
- Safety factor of 4:1
- Conforms to SAE J 189 Specification

P525 AUTO

P5250075		7.5	5/16	3.1	13.7	14	40	210	

- A high performance fuel hose designed to run at higher pressures and temperatures than normal systems
- NBR/PVC inner tube
- · CSM cover
- Kuralon reinforcement
- Conforms to SAE J30 R7 and GME 08001E Specifications

Specifications

- Chloroprene blend tube compound
- Extruded polyamide barrier for low permeation
- Single braid polyester reinforcementChlorobutyl cover compound for low
- Chlorobutyl cover compound for lo moisture ingression
- Permeation: 2.3- 2.6 Kg/m2/yr (tested at 80°C)
- Moisture Ingression: 0.033g/cm2/yr
- Temperature Range of -40°C to +135°C
- Meets SAE J2064 Type C Class I

Features

- · Light weight and flexible for easy routing
- Compatible with R134a and many other vehicular refrigerants
- Compatible with PAG (Polyalkylene glycol) oil and other popular lubricants

^{*} Use hydraulic hand held crimper (beadlock / bubble style) with reduced barrier crimp dies. (Refer to Pirtek Assembly Procedure Document WI-0902-34)

AIR CONDITIONING ASSEMBLIES

ACABR AUTO AIR CONDITIONING ALUMINIUM BRAZING RODS

Product Code	Description
ACABR	Pack of 25 Aluminium brazing rods with flux core

Application

Used to braze Aluminium Weld-On tails to Air Con Tube

ACNBL AUTO AIR CONDITIONING LUBRICANT / SEALANT

Product Code	Description	
ACNBL	ACNBL 30 ml Nylog Blue Lubricant / Sealant	

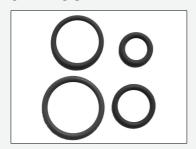

Specifications

- · a synthetic refrigeration oil
- compatible with mixtures of POE (Polyolester oil), PAG, mineral and alkyl benzene oils in the presence of HFC-134a, cross blends of CFC and HCFC refrigerants as well as R-410a in POE and PVE (Polyvinylether) lubricants

Features

- Non-hardening, non-drying fluid
- bonds tenaciously to many different substrates
- acts as a gasket thread sealant and assembly lube
- Can be used universally or specifically with an HFC bound synthetic oil system

ACOR AUTO AIR CONDITIONING O-RINGS

Product Code	Description	
ACOR-6	Air Con O-ring HNBR Green suits -06 (3/8") size	
ACOR-8 Air Con O-ring HNBR Green suits -08 (1/2") size		
ACOR-10	Air Con O-ring HNBR Green suits -10 (5/8") size	
ACOR-12 Air Con O-ring HNBR Green suits -12 (3/4") size		

Specifications

- HNBR (Hydrogenated Nitrile Butadiene Rubber)
- good physical strength and retention properties after long term exposure to oil, heat & chemicals.

Features

 HNBR Green O-rings are used in valves / ports of air conditioning components and hose assemblies.

CABLE TIES INCLUDING STAINLESS STEEL TIES AND INSTALLATION GUNS

Description:

- · All Nylon one piece construction
- Min. loop tensile strength ranging from 8.1kg to a maximum of up to 114kg.
- Cable Ties use UL approved Nylon 6/6 with flamability rating of UL94V-2
- Approved to the requirements of MILITARY 3367 - 1978 and UL Underwriters Laboratories E156597

Product Range:

- · Individual packs
- · Mixed pack
- · Merchandiser tree
- Also in Stainless Steel and as Velcro[®] Magic Ties

Applications:

- A common and useful product for location of hoses in their operating environment
- Use to secure and restrain hose movement to avoid damage through abrasion
- Ideal for urgent small repairs or bundling automotive hoses or electrical cables
- Always take care when using cable ties - consider the application carefully and heed sound installation guidelines. Consult Technical Section A for a guide to installation of hydraulic hoses

PIRTIE

PIRTEK STAPLE RETENTION STRAP

Description:

- The all-new PirTie Staple Retention Strap is typically used on staplelok and superstaplelok ended hose assemblies and adaptors on underground mining equipment
- · Easy to install and trim any excess strap
- No special tools are required. Standard cable tie / flush cutter snips (pictured) are acceptable
- · PirTies are intended for single use only
- The staple is fully encapsulated by the PirTie's scalloped edges, adopting a snug fit. This ensures it does not roll off the staple, whether it be a square or "D" shaped profile
- The PirTie's unique design will accommodate most fitting exterior shapes
- A staple is held in place even if a staple leg breaks, but must be changed out as soon as possible to ensure coupling integrity

Materials Specifications:

 Made from Grey Du-pont UV stabilised virgin flame resistant rated nylon (as required by "MSHA") to a Pirtek registered design

(Patent 2008901384 Pending)

Applications:

 Used whenever the occurrence of accidental staple migration or breakage could cause a potentially dangerous situation

Limitations and Tests:

- A laboratory test has revealed that after 150,000 test impulses at the designed system pressure, the staple leg was found to be broken upon removal of the PirTie. The test was terminated at this point, but further tests are pending.
- At the termination point of the test, no leaks or fitting blowout had occurred, and the PirTie was still intact, indicating that the PirTie provides an added level of safety in the event of staple failure between safety audits.

HOSE CLEANING GUNS, PROJECTILES & KITS

Covers all sizes from 1/4" to 2"

VKIT

(Not illustrated)
Covers all sizes from 1/4" to 1.1/4"

IMPORTANT USAGE NOTE: Hoses must be cleaned FROM BOTH ENDS by use of the appropriate pellet BEFORE installing the fittings

Description:

The Pirtek hose cleaning kit is the ideal choice for high volume cleaning of hydraulic pipes and hoses, as well as dry and liquid flow lines. The unit shoots oversized foam projectiles to clean straight, curved and coiled tubes, pipes and hoses 3/16"-2" (4.8-51mm) I.D. A hinged nozzle housing allows rapid loading of projectiles for fast throughput of large cleaning jobs

Mobile Solution:

For applications where larger hose and tube sizes are not encountered, a smaller kit catering for sizes up to 1.1/4" is available

Special Situations:

A wide range of special projectiles are available to special order for special situations

Examples include:

Abrasive: Hose, tube or pipe with build up of contamination, surface rust or scale.

Grinding: Straight lengths of tube or pipe with greater build up of contamination, surface rust or scale

THREAD IDENTIFICATION AND TOOL KITS

TIK THREAD IDENTIFICATION KIT

VTSMTS 5 PIECE MAGNETIC TOOL KIT

VTSOHP 2 PIECE

O-RING HOOK AND PICK TOOL SET

Product Code	Description
TIK	Thread Identification Kit

Description

 An all-in-one solution that addresses the need for a simplified guide to identifying the wide range of hydraulic fittings in common use world wide

Advantages

- Most kits simply list the various fitting types and give a run-down on their identifying characteristics. With these, identifying an unfamiliar thread involves searching through page after page of technical data.
- Pirtek's Kit adopts a more logical. approach. Simply choose which picture(s) most closely resemble the unknown fitting, and you will be directed to a small selection of fittings that represent the most likely candidates, along with the page numbers on which they appear in detail.

Contents

- · The Tools You Need
 - 3 Steps to Success
- · Pictorial Guides
- BSP / JIC / UNO
- BSP/JIC/UNU
- · SAE / NPT / ORFS
- Flanges
- Metric Ports & Studs
- Metric Compression
- · Millimetrique / GAZ
- · Metric Face Seal (Chinese)
- · JIS Metric & BSP
- · Banjos Metric & BSP
- Staplelok / Super Staplelok
- SKV / SSKV
- · Handy Tips / Variations

Product Code	Description	
VTSMTS	5 Piece Magnetic Tool Kit	

Description:

- A handy tool kit for home, workshops and mobile service vechicles.
- helps find and hold parts and tools, keeping them handy and organised

Contents:

- · 450mm long magnetic tool bar
- Magnetic extendable pocket clip pick up pen
- Magnetic extendable flexible tip pick up tool with LED light
- 150mm diameter magnetic round tray
- 150mm x 250mm magnetic rectangle tray

Specification:

- 430 grade Stainless Steel magnetic tool trays
- the round tray has 1 magnet of magnetic field intensity 1000-1200 gauss
- the rectangle tray has 2 magnets of 1000-1200 gauss each
- the pick-up tool with LED has 6 LED lights and can lift up to 1.4kg. It requires 4 batteries LR 44 (batteries included)
- the 450mm bar can hold up to 12kg of items
- the pocket clip pick up pen can lift up to 0.4kg

Product Code	Description
VTSOHP	2 Piece O-Ring Hook and Pick Tool Kit

Description:

 2 ideal tools for facilitating the removal and installation of o-rings, seals & washers

ription:

- Specification:

 knurled handle design to ensure positive grip is made from aluminium alloy
 - the metal rods are made of S2 alloy steel with tip hardness of between 58-62 Rockwell C

Safety Caution:

Always wear eye protection to prevent personal injury

DUAL HI-LO SPRAY LANCE WITH VENTED GRIP				
Product Code Inlet Outlet Length				
IPW-41.0900.00 1/4" BSP Male 1/4" BSP Fem 1090 mm				

- · Stainless Steel
- · 40 litres/min flow capacity
- 250 bar working pressure
- Vented plastic grip
- Twist grip allows switching between high pressure and detergent

IPW-60.0016.60 PULSAR UNLOADER WITH GAUGE PORT - 3200 psi (220 Bar) W.P.

PULSAR 3 UNLOADER VALVE WITH PRESSURE GAUGE PORT			
Product Code Inlet (2) Outlet By-Pass (2)			
IPW-60.0016.60	3/8" BSP Fem	3/8" BSP Fem	3/8" BSP Fem

- Suits flow rates to 30 litres / min
- 220 bar (3200 psi) working pressure (250 bar max)
- Includes 1/4" BSP pressure gauge port
- 90°C max temperature

IPW-85.240.300 DETERGENT NOZZLE 1/4" TO SUIT DUAL LANCE

Detergent Nozzle				
Product Code	Function			
IPW-85.240.300	Detergent			

- Adds detergent in dual lance guns1/4" BSPT Male Thread
